Nature Reviews’ clinical content is written by internationally renowned clinical academics and researchers and targeted towards readers in the medical sciences, from postgraduate level upwards. In-depth Reviews present authoritative, up-to-date information on a topic, placing it in the context of a field’s history and development. Topical discussion and opinions are offered in Perspectives and News & Views articles, and in the Research Highlights section the editors filter primary research from a range of specialty and general medical journals.

**Nature Reviews Cardiology**
Chief Editor: Bryony Mearns, PhD  
**Impact Factor:** 10.154*  
**Ranking:** 5/125 in Cardiac & Cardiovascular Systems  
**Readership:** Clinicians, researchers and other health care professionals interested in cardiology and its related disciplines (e.g. endocrinology, pathology, nephrology etc.).

Nature Reviews Cardiology delivers timely interpretations of key scientific developments in cardiology research, from general therapies, to imaging, genetics and public health.
