

MODERN PATHOLOGY

www.modernpathology.org

Instructions for Contributors

Modern Pathology is an international journal owned by the United States and Canadian Academy of Pathology and edited by a board appointed by the Council of the Academy. *Modern Pathology* concentrates on all aspects of diagnostic human pathology, contemporary issues pertinent to the practice of pathology, application of methods to enhance diagnostic accuracy, reviews, illustrative studies, clinical medicine directly related to pathology practice, and Academy news. In as many ways as possible, *Modern Pathology* reflects the mission of the annual meetings of the Academy. This mission is to provide a forum for the presentation of advances in the understanding of pathologic processes and evaluation of new and existing diagnostic applications of scientific advances and clinical pathologic correlations; to foster the acquisition and maintenance of up-to-date information to ensure high standards of practice; and, to encourage the publication of new information.

Submit manuscripts. We invite all authors to submit new manuscripts online using the following URL: <http://mts-mpa.nature.com>. Revisions to previously submitted manuscripts must be sent in hard copy (and diskette) to the Editorial Office. For further information contact the Editorial Office (modpath@iupui.edu). To facilitate communication please include fax numbers and email addresses on manuscripts. An original contribution is accepted for review with the understanding that it has been submitted solely to *Modern Pathology*; all persons listed as authors have given their approval for submission of the paper; and, any person listed as a source of personal communication has given permission for such a citation. Copyright of published manuscripts will be held by the United States and Canadian Academy of Pathology and must receive in writing the assignment of copyright from the authors of accepted manuscripts. Copyright forms will be sent to authors from the Editorial Office or can be downloaded from the above noted URL. If you know that your Internet connection is slow (28.8 kbps or below) you may wish to submit low quality artwork for peer review purposes. High quality artwork will then be requested if your paper is accepted.

The aim of the review process is to provide an impartial, critical, and timely evaluation of each paper based on its scientific merit, novelty, and interest to the readership of the journal. All submissions are reviewed by a member of the Executive Editorial Board, and in most cases, additional outside reviews are sought. All decisions are made by the entire Executive Editorial Board, usually within six weeks of receipt. Manuscripts are either i) accepted as is, ii) returned to authors for minor revision, iii) rejected with an invitation to resubmit (ie, additional experiments are needed), or iv) rejected. Accepted manuscripts are typically published within 10 weeks.

Illustrations. Formats for figures are explained in full at <http://www.nature.com/sj/information/artworkguidelines.pdf>. Authors are requested to read and follow this information upon acceptance of their manuscript. At submission, figures should be of high enough resolution to be assessed by referees, ideally as JPEGs. Very high-resolution figures are often too large to send to referees. Print quality artwork will be required at the time of acceptance.

Articles Online. Authors are invited to submit supplementary data with the online version of their paper for the journal website. Supplementary data will be subject to the same editorial standards and peer review process as the main manuscript; only data which substantially contributes to the manuscript will be accepted for online publication. Authors should state their reasons for including their supplementary data. Any supplementary material should be cited at the appropriate place in the manuscript itself, with the words 'see supplementary information'. Supplementary material may include text (eg, information on methods) and/or figures (including colour figures) which cannot be included in the print journal for reasons of space or cost, and video clips (which should be produced using Quick Time software). Supplementary material must be supplied to the publisher in its final form, it will not be subedited so authors must ensure that it is supplied ready for publication online. Please supply supplementary material as separate files, clearly marked as supplementary, with the file names, author's surname and manuscript number.

Manuscript Preparation. Papers should be double-spaced throughout, with ample margins. All pages, should be sequentially numbered, and the first author's name must appear in the upper right corner of each page. Papers not conforming to journal style will be returned without review. Manuscripts should be organized according to the following style:

(1) Title page. Include: a concise title of no more than 150 characters, all authors' name (not initials) and institutional affiliations, short running title of no more than 40 characters, grant numbers and sources of support, name and address of author(s) to whom correspondence, galley and reprint requests should be sent.

(2) Abstract. Submit on a separate page. The abstract describes in less than 300 words exactly what was done, the results obtained, and the conclusions drawn. Following the abstract provide an alphabetical list of abbreviations and a list of key words (up to 7) in alphabetical order for coding and indexing.

(3) Text. Articles start with introductory material that describes the hypothesis, there is no heading. After that, the main heads appear in this order: "Materials and Methods", "Results", "Discussion", "Acknowledgments" (optional), and "References". Where appropriate, names and exact locations of manufacturers are cited. All authors are responsible for recognizing and disclosing any duality of interest in the acknowledgments, making known all financial support and any other personal connections. This includes, but is not limited to: funding, such as salaries, equipment, supplies, reimbursement for attending symposia, etc. from organizations that may gain or lose financially through the publication of the paper; personal financial interests, such as stocks and shares in companies that may gain or lose financially from publication, consultation

fees or forms of remuneration from organizations that may gain or lose financially, or patent and patent applications whose value may be affected; and, employment, whether recent, present or anticipated, by an organization that may gain or lose from publication of the paper. If you have no duality of interest to declare, please state this and we will add the following text to your paper: "Duality of interest: None declared".

(4) References. References are to be numbered in the order of citation within the text, and should be listed in numeric order on a separate page(s) at the end of the article. Citations in the main text should appear as Arabic numerals in parentheses. References with less than six authors should list all names; for more than six authors, list the first name followed by et al. Periodical abbreviations should follow those used by Index Medicus. Individual references should be formatted in the Vancouver style, as follows:

Journal: Weed SA, Stabach PR, Oyer CE, Gallagher PG, Morrow JS. The lethal hemolytic mutation in beta I sigma 2 spectrin Providence yields a null phenotype in neonatal skeletal muscle. *Lab Invest* 1996;74:1117-1129

Book: Feldman RS, Meyer JS, Quenzer LF. Principles of Neuropsychopharmacology. London: Palgrave, 1997.

Chapter in Edited Book: Pober JS. Vascular endothelium in transplantation. In: Tilney NL, Strom TB, Paul LC, editors. Transplantation biology: Cellular and molecular aspects. 1st ed. Philadelphia, PA: Lippincott-Raven; 1996. p. 127-36.

Online Publication: Citations for articles published first online should be formatted as follows: Meador-Woodruff JH, Davis KL, Haroutunian V. Abnormal kainate receptor expression in pre-frontal cortex in schizophrenia. *Neuropsychopharm*, print copy in press 2000 Aug. Available from: URL: www.acnp.org/citations/Npp08080001/. When the manuscript is published in the journal, replace "in press" with the appropriate volume and page number.

(5) Abbreviations/Acronyms are defined in both the abstract and body of the text as follows: vascular permeability factor (VPF); transforming growth factor- β (TGF- β). They are used in the abstract only if they appear twice in addition to first mention; and in the body of the text only if they appear three times in addition to first mention.

(6) Tables and table legends are clearly numbered and type double-spaced on separate pages.

(7) Figure legends are typed on a separate page.

(8) Color Figures. Authors may submit figures in color, but inclusion is subject to the Editor-in-Chief's discretion. If color figures are accepted, they will be typeset in order of mention. There will be no charge for up to two pages of color figures; the author will be responsible for the production costs of additional color images (\$500 per additional page). Online color figures will be handled free of charge, as will all black and white figures.

Color on the web

Authors who wish their articles to have FREE color figures on the web must supply separate files in the following format. (See 'Articles online' for more information regarding supplementary information).

For Single Images:

Width	500 pixels (authors should select "constrain proportions", or equivalent instructions, to allow the application to set the correct height automatically.)
Resolution	72 dpi (dots per inch) – or "Save for Web" if using Photoshop [®]
Format	JPEG for photographs GIF for line drawings or charts
Filenaming	Please save image with .jpg or .gif extension to ensure it can be read by all platforms and graphics packages.

For Multi-part Images:

Width	900 pixels (authors should select "constrain proportions", or equivalent instructions, to allow the application to set the correct height automatically.)
Resolution	72 dpi (dots per inch) – or "Save for Web" if using Photoshop [®]
Format	JPEG for photographs GIF for line drawings or charts
Filenaming	Please save image with .jpg or .gif extension to ensure it can be read by all platforms and graphics packages.

Authors may be asked to pay the full color fee for figures that are not submitted in the format described above.

Reprints are ordered from the publisher when page proofs are returned.

Permissions information. Written permission to reproduce borrowed material (illustrations, tables and identifiable clinical photographs) must be obtained. Borrowed material should be acknowledged in the captions in this style: 'Reproduced by kind permission of... (publishers)... from... (reference).' It is the responsibility of the author to obtain all such permissions from the original publishers and authors, and to submit them with the typescript.
