</table>

Abbreviations: DoI = duration of illness; FRADD = final recorded antipsychotic drug dose in mg chlorpromazine equivalents / day; PMI = post-mortem interval. * these subjects were used for the microarray study

Notes: Anticholinergic Drugs and Benzodiazepines are listed as whether or not they have been prescribed. Cannabinoids, alcohol and other non-prescribed drugs are listed when detected in blood or urine after autopsy.

NicAlert Score relative to cotinine concentrations (mg / ml): 0 = 0-10, 1 = 10-30, 2 = 30-100, 3 = 100-200, 4 = 200-500, 5 = 500-1000, 6 > 1000. Scores > 3 indicative of use of tobacco.

A positive NicAlert score (> 3) is indicative of exposure to nicotine 48 hrs before sample collection.
