Nature **495**, 529–533 (2013); doi:10.1038/nature11980

After re-examination of this Letter, concerns with some of the reported data were raised. It was found that two confocal images were near-identical in panels of Figure 3 and two confocal images were re-used in panels of Figure 4, and that some gel images were inappropriately generated by cutting and pasting of non-adjacent bands. Therefore, we feel that the most responsible action is to retract the paper. We sincerely apologize for any adverse consequences that may have resulted from the paper's publication.

Correspondence should be addressed to P.D. (p.b.dhonukshe@gmail.com).
