NewLab BioQuality AG

Contract Quality Control on Biopharmaceuticals

Count on an experienced partner in contract quality control of recombinant proteins, monoclonal antibodies, products for gene therapy, blood-derived products, and products of mammalian origin.

As the leading German specialist in contract quality control we offer high end expertise at your service.

Our service:

- cellbanking – characterisation of MCB, WCB, EPC
- contaminants and impurities, such as residual DNA, proteins/HCP, endotoxins
- development and validation of test procedures
- bioassays
- viral safety, validation studies

Biofrontera

Bridges to better therapy

Biofrontera Pharmaceuticals AG is an expanding neuroscience company located in Leverkusen/Germany. Biofrontera engages in the development of new drug candidates using high-resolution expression profiling, bioinformatics, genetic animal models and HTS. Biofrontera's R&D presently focuses on Parkinson's disease, chronic pain, schizophrenia and stroke.

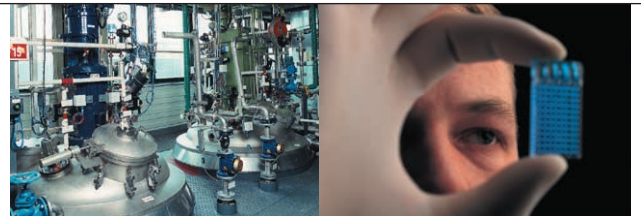

We are currently seeking

- **Molecular Biologists (PhD)**
- **Research Technicians/Scientists**
- **Computational scientists**

For further information please visit our web-page www.biofrontera.com.
