

Introducing GenoM™ -96 Automated Nucleic Acid Isolation

High Quality, Easy, Reliable and Flexible

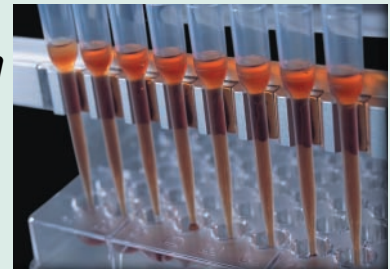

- Standard 96 plate format
- Cost efficient
- Small scale preparation
- Process 8-96 samples per run

True Walk-Away Automation

GenoVision offers a unique and simple method for genomic DNA isolations from whole blood, dried blood, buccal swabs and cells

Using the GenoM™ -96 Robotic Workstation in combination with the GenoPrep™ from Blood Kit gives you the high quality DNA you need
