Supplementary figure 3 Electrophysiological properties of FS interneurons and SCs at different ages between P3 and P9. For FS interneurons at P3-5 n = 33, P6-7 n = 21, P8-9 n = 23; for SCs at P3-5 n = 15, P6-7 n = 13, P8-9 n = 18. Changes that are statistically significant relative to P3-5 are indicated by * (P < 0.05), ** (P < 0.01) and *** (P < 0.005).
