

Table 15. Least Significant Difference planned post-hoc comparisons*

Group	Comparison	P
Pre-pubertal	Pubertal	.000148*
	3 β -THP - Pre-pubertal	.029*
	Pre-pubertal - $\delta^{-/-}$.045*
	Pubertal - THP	.0000206*
Pubertal	Pre-pubertal	.000148*
	3 β -THP - Pre-pubertal	.0119*
	3 β -THP - Pubertal	.0196*
	Adult	.0000526*
	Pubertal - finasteride	.042*
	Pre-pubertal - THP	.0000000675*

*Similar results obtained with Duncan's test. These results were based on percentage changes induced by stress. Similar statistical results were obtained when absolute values of open arm time were compared across groups.
