Celebrating a decade of progress ................................................................. 487

New dimensions of neuronal plasticity ......................................................... 489
Nicholas C. Spitzer
> SEE ARTICLES, PAGES 515 AND 521

Monkey business builds a bridge to the human brain ............................... 491
Michael A. Paradiso
> SEE ARTICLE, PAGE 555

Adjusting reaches: feedback in the posterior parietal cortex ...................... 492
Marco Iacoboni
> SEE ARTICLE, PAGE 563

Quantal GABA release: noise or not? .......................................................... 494
Kevin J. Staley
> SEE SCIENTIFIC CORRESPONDENCE, PAGE 499

Don't stress aggressors .................................................................................. 497
The Biology of Violence: How Understanding the Brain, Behavior, and Environment Can Break the Vicious Cycle of Aggression, by Debra Niehoff
Reviewed by James Blair

Seizures affect quantal GABA release ......................................................... 499
J C Hielsch, C Agassandian, A M erchán-Pérez, Y Ben-Ari, J DeFelipe,
M Esclapez and C Bernard
> SEE NEWS AND VIEWS, PAGE 494

Deficit of quantal release of GABA in experimental models of temporal lobe epilepsy ................................................................. 499
J C Hielsch, C Agassandian, A M erchán-Pérez, Y Ben-Ari, J DeFelipe,
M Esclapez and C Bernard
> SEE SCIENTIFIC CORRESPONDENCE, PAGE 499
Does use of a myoelectric prosthesis prevent cortical reorganization and phantom limb pain? .......................... 501
M Lotze, W Grodd, N Birbaumer, M Erb, E Huse and H Flor

articles

Reversal of synaptic vesicle docking at central synapses ......................................................... 503
V N Murthy and CF Stevens

Dendritic I_h normalizes temporal summation in hippocampal CA1 neurons ........................... 508
J C Magee

Plasticity in the intrinsic excitability of cortical pyramidal neurons ............................. 515
N S Deo, L C Rutherford and G G Turrigiano

How voltage-dependent conductances can adapt to maximize the information encoded by neuronal firing rate ................................. 521
M Stemmler and C Koch

Target-specific control of nicotinic receptor expression at developing interneuronal synapses in chick ........................................ 528
P Devay, D S McGehee, C R Yu and L W Role

Generation of cerebellar granule neurons in vivo by transplantation of BMP-treated neural progenitor cells .................................. 535
J Alder, K J Lee, T M Jessell and M E Hatten

The tetrodotoxin-resistant sodium channel SNS has a specialized function in pain pathways .................................. 541

Effects of similarity and history on neural mechanisms of visual selection ......................... 549
N P Bichot and J D Schall

Functional imaging of the monkey brain ................................................................. 555
N K Logothetis, H Guggenberger, S Peted and J Pauls

Role of the posterior parietal cortex in updating reaching movements to a visual target .................. 563
M Desmurget, C M Epstein, R S Turner, C Prablanc, G E Alexander and S T Grafton

Activation of the middle fusiform ‘face area’ increases with expertise in recognizing novel objects ................................................ 568
I Gauthier, M J Tarr, A W Anderson, P Skudlarski and J C Gore

Contrast polarity and face recognition in the human fusiform gyrus .................................. 574
N George, R J Dolan, G R Fink, G C Baylis, C Russell and J Driver
