EDITORIAL

295 Putting excellence at the heart of European research

RESEARCH HIGHLIGHTS

297 Expanding the RNA tool box
298 Getting under the skin of a mouse
298 The sensitive side of protein-DNA interactions
299 News in brief
300 Efficient evolution
302 Offspring of orphan genes
304 DEALing with protein microarrays

NEWS AND VIEWS

307 The rise of the ‘projectome’
Narayanan Kasthuri & Jeff W Lichtman
see brief communication page 311, article page 331

308 Do-it-yourself RNAi made easy?
Bernard Mathey-Prevot & Norbert Perrimon
see article page 337

TECHNOLOGY FEATURE

367 To build a better model
Steven D Buckingham

APPLICATION NOTES

i Rapid isolation of antigen-specific clones from hybridoma fusions
Christopher J Mann

iii Functional studies of microRNA based on knockdown using Locked Nucleic Acid probes
Søren Rasmussen & Peter Roberts

v Small RNA analysis using the Genome Sequencer™ FLX system
Thomas Jarvie & Timothy Harkins
BRIEF COMMUNICATIONS

311 High-resolution three-dimensional imaging of large specimens with light sheet–based microscopy
Peter J Verveer, Jim Swoger, Francesco Pampaloni, Klaus Greger, Marco Marcello & Ernst H K Stelzer
see news and views page 307

315 Single-molecule analysis of DNA-protein complexes using nanopores
Breton Hornblower, Amy Coombs, Richard D Whitaker, Anatoly Kolomeisky, Stephen J Picone, Amit Meller & Mark Akeson

319 Subunit counting in membrane-bound proteins
Maximilian H Ulbrich & Ehud Y Isacoff

323 Targeting neural circuitry in zebrafish using GAL4 enhancer trapping
Ethan K Scott, Lindsay Mason, Aristides B Arrenberg, Limor Ziv, Nathan J Gosse, Tong Xiao, Neil C Chi, Kazuhide Asakawa, Koichi Kawakami & Herwig Baier

327 Multiplexed protein detection by proximity ligation for cancer biomarker validation
Simon Fredriksson, William Dixon, Hanlee Ji, Albert C Koong, Michael Mindrinos & Ronald W Davis

ARTICLES

331 Ultramicroscopy: three-dimensional visualization of neuronal networks in the whole mouse brain
Hans-Ulrich Dodt, Ulrich Leischner, Anja Schierloh, Nina Jährling, Christoph Peter Mauch, Katrin Deininger, Jan Michael Deussing, Matthias Eder, Walter Zieglgänsberger & Klaus Becker
see news and views page 307

337 Genome-wide resources of endoribonuclease-prepared short interfering RNAs for specific loss-of-function studies
Ralf Kittler, Vineeth Surendranath, Anne-Kristin Heninger, Mikolaj Slabicki, Mirko Theis, Gabriele Putz, Kristin Franke, Antonio Caldarrelli, Hannes Grabner, Karol Kozak, Jan Wagner, Effi Rees, Bernd Korn, Corina Frenzel, Christoph Sachse, Birte Sönnichsen, Jie Guo, Janell Schelter, Julisa Burchard, Peter S Linsley, Aimee L Jackson, Bianca Habermann & Frank Buchholz
see news and views page 308

345 Fluorescence imaging of amyloid formation in living cells by a functional, tetracysteine-tagged α-synuclein
Maria J Roberti, Carlos W Bertoncini, Reinhard Klement, Elizabeth A Jares-Erijman & Thomas M Jovin

353 Unitary permeability of gap junction channels to second messengers measured by FRET microscopy
Victor H Hernandez, Mario Bortolozzi, Vanessa Pertegato, Martina Beltramello, Michele Giarin, Manuela Zaccomo, Sergio Fantano & Fabio Mammano

PROTOCOL

359 Three-dimensional culture models of normal and malignant breast epithelial cells
Gene Y Lee, Paraic A Kenny, Eva H Lee & Mina J Bissell
