Discover our Open Access Funding Support Service

Did you know that there are almost 200 open access article processing charge (APC) funds available to researchers worldwide?

Our free funding support service helps you discover and apply for open access APC funds that are available to you.

We can:
- Provide personal information on the open access funds available to you.
- Direct you to the correct open access funding coordinator at your institution/funding body.
- Supply you with the information required to complete an open access funding application.
- Provide text demonstrating the benefits of open access to support your application.
- Give personalized advice about the application process for your institution/funding body.
- Provide advice about compliance with funders’ and institutions’ open access policies.

Visit our website to discover which funds are available to you: nature.com/openresearch/funding
