Discover our Open Access Funding Support Service

Did you know that there are almost 250 open access article processing charge (APC) funds available to researchers worldwide?

- Over 90 funders worldwide make funding available to researchers
- Over 150 institutions make funding available to researchers
- An additional 170 research institutions distribute open access block grants on behalf of funding bodies

Our free funding support service helps you discover and apply for open access APC funds that are available to you.

We can:
- Provide personal information on the open access funds available to you.
- Direct you to the correct open access funding coordinator at your institution/funding body.
- Supply you with the information required to complete an open access funding application.
- Provide text demonstrating the benefits of open access to support your application.
- Give personalized advice about the application process for your institution/funding body.
- Provide advice about compliance with funders’ and institutions’ open access policies.
