and less hairy flowers and inflorescence. (b) Cheirostylis grandiflorus, Blume, found "in moist forests between rocks on the coast of New Guinea," is now recorded from similar situations near Lismore, Richmond River, N.S.W. Its discovery adds a genus to the flora of Australia. (c) Grevillea alpina, Lindl, hitherto only recorded from Victoria, has been found in the Albury district. -On a new fungus (Capnodium callitris) attacking the Murray pine; together with observations on a on some Australian gudgeons (Electridinæ), by J. Douglas Ogilby.—Descriptions of some new Araneidæ of New South Wales. No. 7, by W. J. Rainbow.—Contributions to a knowledge of the arachnidan fauna of Australia, No. 1, by W. J. Rainbow. This paper, the first of a new series, is descriptive of a new scorpion (Buthus flavieruris) from Como, obtained by Mr. J. D. Ogilby.—On Domatia in certain Australian and other plants, by Alex. G. Hamilton.—Description of a new species of Pupina from Queensland, by C. E. Beddome.—Revision of rupina from Queensiand, by C. E. Beddome.—Revision of the genus *Paropsis*, Part i., by Rev. T. Etheridge, jun., and John Mitchell.—Note on a Papuan throwing stick, by J. Jennings.—On the so called evidences of glaciation on the Mt. Kosciusko plateau, by Rev. J. Milne Curran. The author concluded that (1) there is no satisfactory evidence of glaciers in the present valleys. (2) There is absolutely no evidence of extensive glaciation on the Kosciusko plateau. (3) The "glacial epoch in Australia" in Post-Tertiary times as described by Dr. Lindenfeld, has no foundation in fact.
