Association of 4-Repeat Allele of the Dopamine D4 Receptor Gene Exon III Polymorphism and Response to Methylphenidate Treatment in Korean ADHD Children

Keun-Ah Cheon, Boong-Nyun Kim and Soo-Churl Cho

Neuropsychopharmacology (2007) **32**, 1431. doi:10.1038/sj.npp.1301407

Correction to: *Neuropsychopharmacology* (2007) **32**, 1377–1383. doi:10.1038/sj.npp.1301244

Following the online publication of this article, the authors noted the following errors:

1. The third sentence of the abstract should read 'An improvement of more than or equal to 50% in the ADHD Rating Scale-IV (ARS) scores after 8 weeks of treatment

compared with the baseline ARS scores before the treatment was considered as a 'good response', whereas an improvement of less than 50% was considered as a 'poor response'.

2. The first sentence under the subhead 'DRD4-Exon3 Genotype Determination' should read 'The DRD4-exon III repeat region was genotyped by a PCR-based length polymorphism'.
