

have his land declared a private reserve. This will help to maintain the scenic amenities of New Zealand.

The North-East Passage

SINCE Baron A. E. Nordenskiöld in the *Vega* made the North-East Passage in 1878-79, other ships have followed the same route; but it was not until 1932 that the journey was made in one season. In that year Capt. O. J. Schmidt took the ice-breaker *Siberiakov* from Archangel to Vladivostok. It is now reported by Science Service that in 1934 the ice-breaker *Theodor Lütke*, commanded by Capt. Nikolaev, went from Vladivostok to Murmansk in eighty-three days. It should, however, be noted that heavy ice was encountered, and that the passage would have been impossible for a less powerful vessel. These achievements hold out little prospect for an ordinary unprotected trading vessel making use of the route for through passages.

Study of Malnutrition

A PUBLIC meeting, organised by the Committee against Malnutrition, will be held at the Conway Hall, Red Lion Square, London, W.C.1, on Thursday, May 16, at 8 p.m., to consider the health and nutrition of women and children in Great Britain. The chair will be taken by Prof. V. H. Mottram, and Miss Eleanor Rathbone, M.P., Dr. Janet Vaughan, and Prof. Marrack will be among the speakers. Tickets at 1s. each can be obtained from the Honorary Secretary, Mr. F. le Gros Clark, 190 Eagle Street, Holborn, W.C.1. The Committee against Malnutrition, which is a non-party organisation and has been in existence for a little more than a year, was established to obtain information respecting under-nourishment among families of unemployed and low-paid workers, and to co-ordinate efforts towards securing adequate nourishment for all. It publishes a bi-monthly bulletin, and organises propaganda on the subject. The annual subscription is 5s.

Announcements

THE King has been graciously pleased to command that the African Society shall henceforth be known as "The Royal African Society".

DR. WALLACE RUDDELL AYKROYD has been appointed by the governing body of the Indian Research Fund Association to the post of director of nutritional research under that Association.

A MEETING, followed by a discussion, will be held by the British Science Guild in association with the Engineers' Study Circle on Economics, on Thursday, May 16 at 5.30 p.m. in the Lecture Theatre of the Institution of Civil Engineers, Great George Street, S.W.1, when a report on schemes and proposals for economic and social reforms will be presented by Lieut.-Col. J. V. Delahaye. Tickets (for which there is no charge) are obtainable on application to the Secretary of the British Science Guild, 6 John Street, Adelphi, W.C.2.

THE North East Coast Institution of Engineers and Shipbuilders, Newcastle-on-Tyne, will celebrate the attainment of its jubilee by a series of meetings

to be held on July 16-19, in Newcastle-on-Tyne. The celebrations will open with a reception at Armstrong College. On July 17 there will be a meeting to confer honorary fellowships, after which three papers will be read dealing with developments in ship construction during the past fifty years. On July 18 papers on marine engine construction, including turbines, reciprocating steam engines, boilers and heavy oil engines, and on recent progress in electrical and general engineering, are to be read, and on the following day Sir Westcott Abell will deliver a citizens' lecture on "Ships through the Ages".

WE regret that in the article on "Canadian Water Power Developments in 1934", in our issue of April 27, p. 642, it was stated that the investment represented by the present development is estimated at 1,743,000 dollars. This should read 1,743,000,000 dollars.

"CATTLE IN THE TROPICS" is the title of a booklet by Prof. Cecil Wood of the Imperial College of Tropical Agriculture, Trinidad (Government Printing Office, Port-of-Spain, 1934). It gives much useful information on the species and breeds of cattle suited to tropical conditions, their utilisation as draught animals and for meat and milk production, harnessing, feeding and general care, breeding and improvement. Sections are also devoted to their health and the diseases which affect them, and to the organisation of the industry.

APPLICATIONS are invited for the following appointments, on or before the dates mentioned:—A professor of physiology in University College, Dundee (University of St. Andrews)—The Secretary (May 17). A temporary assistant engineer in the Ministry of Transport—The Establishment Officer, Ministry of Transport, Whitehall Gardens, London, S.W.1 (May 17). Chemists for the War Department chemist, Woolwich Arsenal—The Under-Secretary of State (C.5), The War Office, London, S.W.1 (May 18). A secretary to the Advisory Council for Technical Education in South Wales and Monmouthshire—The Advisory Council, County Hall, Cardiff (May 18). A teacher of mechanical engineering and a teacher of electrical engineering in the Schools of Technology, Art and Commerce, Oxford—The Secretary for Education, Education Office, George Street, Oxford (May 20). An animal husbandry expert under the Imperial Council of Agricultural Research, India—The High Commissioner for India, General Department, India House, Aldwych, London, W.C.2 (May 25).
