

SUBJECT INDEX VOLUME 18

- A**
- Abstinence, ethanol, 125
 - Acetylcholine, depression and drug dependence, 135
 - ACTH, cocaine, 263
 - Addiction, smoking, 456
 - Affective disorders, dexamethasone-CRH test, 253
 - Aggression, sertraline and alcoholism, 431
 - Aging, Alzheimer's disease, 407
 - Alcohol abuse, sertraline, 431
 - Alcohol dependence, Native Americans, 282
 - Alcohol deprivation effect, acamprosate, 125
 - Alcoholism
 - attention-deficit hyperactivity disorder (ADHD), 10
 - sertraline, 431
 - Alfentanil, stimulant-opioid interactions, 325
 - Alprazolam, carbamazepine effects, 364
 - Alzheimer's disease, Serotonin, 407
 - Amino acids, tryptophan depletion and sleep, 112
 - Amphetamine, schizophrenia, 293
 - D-Amphetamine, stimulant-opioid interactions, 325
 - Animal models, antipsychotic agents, 63
 - Antidepressants, pindolol, 395
 - Antipsychotic agents
 - clozapine, 50
 - haloperidol, 41
 - NMDA receptors, 197
 - novel, 63
 - schizophrenia, 293
 - Anxiety
 - antipsychotic agents, 63
 - dopamine, 210
 - Apomorphine, prepulse inhibition effects on startle reflex, 50
 - Attention-deficit hyperactivity disorder (ADHD), serotonin and alcoholism, 10
- B**
- Baclofen, divalproex sodium effects, 370
 - Basal ganglia, c-Fos, 480
 - Behavioral sensitization, cocaine, 26
 - Benzodiazepines, dependence, 135
 - Blood platelet, obsessive-compulsive disorder, 102
 - Blood pressure, cocaine, 263
 - Brain blood flow, cocaine, 377
 - Burst pattern, quinpirole sensitivity after cocaine, 223
- C**
- ¹¹C-Raclopride, ketamine modulation of dopamine, 18
 - Carbamazepine, effects on alprazolam, 364
 - Catalepsy, haloperidol, 480
 - Cebus monkeys, haloperidol, 399
 - Chemical sensitivity, cocaine, 385
 - Children, attention-deficit hyperactivity disorder (ADHD), 10
 - Chromosome 6, psychiatric illness, 233
 - Chromosome 18, psychiatric illness, 233
 - Chromosome 21, psychiatric illness, 233
 - Clonidine, polydipsia, 272
 - Clozapine
 - effects, 63
 - prepulse inhibition effects on startle reflex, 50
 - ventral pallidal/mediodorsal thalamic system, 352
 - Cocaine
 - chemical sensitivity, 385
 - dopamine receptors, 26
 - ischemic stroke, 377
 - MDMA, 469
 - quinpirole sensitivity, 223
 - stimulant-opioid interactions, 325
 - tolerance, 263
 - Cognition
 - antipsychotic agents, 63
 - schizophrenia, 186
 - Comorbidity, depression and drug dependence, 135
 - Corticotropin, dexamethasone-CRH test with affective disorders, 253
 - Corticotropin-releasing factor
 - depression and drug dependence, 135
 - serotonin, 492
 - Crossover design, enalapril and clonidine, 272
 - CYP3A4, carbamazepine effects, 364
- D**
- Dependence, smoking, 456
 - Depression
 - Alzheimer's disease, 407
 - antipsychotic agents, 63
 - major, high-dose thyroxine, 444
 - neurobiological similarities, 135
 - therapy-resistant, high-dose thyroxine, 444
 - Depressive disorder, genetics, 233
 - Dexamethasone-CRH test, affective disorders, 253
 - Divalproex sodium, growth hormone response to baclofen, 370
 - DOI
 - behavioral effects, 339
 - effects, 57
 - Dopamine
 - depression and drug dependence, 135
 - homovanillic acid, 317
 - quinpirole sensitivity after cocaine, 223
 - Dopamine antagonists, haloperidol, 399
 - Dopamine receptors
 - D₁, cocaine, 26
 - D₂
 - anxiety, 210
 - cocaine, 26
 - D₃, binding in brain, 305
 - psychiatric illness, 233
 - Dopamine release, smoking, 456
 - Dorsal raphe nucleus, corticotropin-releasing factor, 492
 - Double-blind method, haloperidol vs. olanzapine, 41
 - Drug dependence, neurobiological similarities, 135
 - Drug discrimination, stimulant-opioid interactions, 325
 - Drug trials, enalapril and clonidine, 272
 - Dystonias, haloperidol, 399
- E**
- Emission computed tomography, Alzheimer's disease, 407
 - Enalapril, polydipsia, 272
 - ERPs, alcohol in Native Americans, 282
 - Ethanol
 - acamprosate, 125
 - dependence, 135
 - Euphoria, cocaine, 263
 - Event-related potentials
 - alcohol in Native Americans, 282
 - psychiatric illness, 233
 - Extrapyramidal side effects
 - antipsychotic agents, 63
 - haloperidol, 399
- F**
- Family study, obsessive-compulsive disorder, 102
 - Fear, dopamine, 210
 - Fenfluramine, attention-deficit hyperactivity disorder (ADHD), 10
 - Fentanyl, stimulant-opioid interactions, 325
 - c-Fos, haloperidol, 480
 - Frontal cortex, schizophrenia, 1
- G**
- GABA, growth hormone response to baclofen, 370
 - GABA_B receptor, growth hormone response to baclofen, 370
 - Gamma-aminobutyric acid, depression and drug dependence, 135
 - Gene regulation, obsessive-compulsive disorder, 102
 - Genetic linkage, psychiatric illness, 233
 - Genetics
 - haloperidol, 480
 - manic-depressive illness, 233
 - schizophrenia, 233
 - Genotypes, psychiatric illness, 233
 - Glutamate, dopamine modulation, 18
 - Goldstein, Menek, in memoriam, 321
 - Growth hormone, divalproex sodium effects, 370
 - [³⁵S]-GTPγS, pindolol effects, 395

H

Hallucinogens, effects, 57
 Haloperidol
 double-blind method, 41
 effects, 63
 extrapyramidal side effects, 399
 c-Fos, 480
 ventral pallidal/mediodorsal thalamic system, 352
 Heroin, stimulant-opioid interactions, 325
 Hippocampus, schizophrenia, 1
 Homovanillic acid, renal factors, 317
 5-HT_{1A}, pindolol effects, 395
 5-HT_{2A} receptors
 effects, 57
 M100907 effects, 197
 5-HT_{2C} receptors, effects, 57
 5-Hydroxyindoleacetic acid, homovanillic acid, 317

I

In memoriam, Goldstein, Menek, 321
 Inbred strains
 dopamine, 210
 haloperidol, 480
 Indoleamine, corticotropin-releasing factor, 492
 Ischemia, cocaine, 377
 Isolation housing, dopamine, 210

K

Ketamine, dopamine modulation, 18

L

Limbic system, cocaine, 385
 Linkage disequilibrium, psychiatric illness, 233
 Locomotion, MDMA, 469
 Locomotor activity, hallucinogens, 339
 LSD
 behavioral effects, 339
 effects, 57

M

Magnetic resonance imaging, functional, 186
 MAO inhibition, smoking, 456
 MDL 100,907, behavioral effects, 339
 MDMA, behavioral and neurochemical sensitization, 469
 Medial prefrontal cortex, antipsychotic agents, 197
 Mediodorsal thalamic nucleus, antipsychotic agents, 352
 Memory, schizophrenia, 186
 Metabolism, carbamazepine, 364
 Microdialysis
 corticotropin-releasing factor, 492
 MDMA, 469
 MK-801, effects, 57
 Mood, tryptophan depletion and sleep, 112
 Morphine, stimulant-opioid interactions, 325
 Motivation, depression and drug dependence, 135
 Mouse, haloperidol, 480
 MRI
 functional, 186

polysubstance abuse, 243

N

N-acetyl-aspartate, schizophrenia, 1
 Native Americans, alcohol dependence, 282
 Negative symptoms, antipsychotic agents, 293
 Neuropeptide Y, depression and drug dependence, 135
 Neuropharmacology, nicotine, 456
 Nicotine
 dependence, 135
 neuropharmacology, 456
 schizophrenia, 175
 NMDA receptors
 effects, 57
 M100907 effects, 197
 Norepinephrine, depression and drug dependence, 135
 Nucleus accumbens
 cocaine, 26
 MDMA, 469

O

Obsessive-compulsive disorder, serotonin transporter and blood serotonin, 102
 [³H]7-OH-DPAT, binding in brain, 305
 Opiates, dependence, 135

P

P3, alcohol in Native Americans, 282
 [³H]PD 128907, binding in brain, 305
 Pharmacokinetics
 carbamazepine, 364
 cocaine, 263
 Phencyclidine, schizophrenia, 293
 Pindolol, agonist and antagonist actions, 395
 Plasma, homovanillic acid, 317
 Polydipsia, psychogenic, enalapril and clonidine, 272
 Positive symptoms, antipsychotic agents, 293
 Positron emission tomography, ketamine modulation of dopamine, 18
 Prefrontal, schizophrenia, 186
 Prefrontal cortical lesions, antipsychotic agents, 352
 Prefrontal lobe, polysubstance abuse, 243
 Prepulse inhibition, clozapine, 50
 Primate, sertraline, 431
 Psychogenic polydipsia, enalapril and clonidine, 272
 Psychomotor stimulants, dependence, 135
 Psychostimulants, cocaine, 385
 Pyramidal cells, antipsychotic agents, 197

Q

Quality of life, schizophrenia, 41
 Quinpirole, sensitivity after cocaine, 223

R

Rat brain, [³H]PD 128907, 305
 Rats
 cocaine, 223
 hallucinogen effects, 339

schizophrenia, 293
 Receptor autoradiography, [³H]PD 128907, 305
 Receptor binding, [³H]PD 128907, 305
 Receptor profiles, antipsychotic agents, 63
 Receptors, Alzheimer's disease, 407
 Reinforcement, smoking addiction, 456
 Relapse, alcohol deprivation effect, 125
 REM sleep, tryptophan, 112
 Renal factors, homovanillic acid, 317
 Review, depression and drug dependence, 135
 Reward, depression and drug dependence, 135
 Rhesus monkeys, stimulant-opioid interactions, 325

S

Saccades, smoking and schizophrenia, 175
 Schizophrenia
 antipsychotic agents, 41, 197, 293, 352
 fMRI, 186
 genetics, 233
 5HT_{2A} receptors, 57
 smoking, 175
 Seasonal variation, obsessive-compulsive disorder, 102
 Self-administration, acamprosate, 125
 Self-medication, depression and drug dependence, 135
 Sensitization, MDMA, 469
 SER-082, behavioral effects, 339
 Serotonin
 alcoholism, 431
 Alzheimer's disease, 407
 attention-deficit hyperactivity disorder (ADHD), 10
 corticotropin-releasing factor, 492
 depression and drug dependence, 135
 homovanillic acid, 317
 obsessive-compulsive disorder, 102
 tryptophan depletion and sleep, 112
 Serotonin-1A, haloperidol, 399
 Serotonin transporter, obsessive-compulsive disorder, 102
 Sertraline, alcoholism, 431
 Side effects, extrapyramidal, 63
 Single oral dose, carbamazepine, 364
 Single-unit recording, quinpirole sensitivity after cocaine, 223
 Smoking
 addiction, 456
 schizophrenia, 175
 Smooth pursuit eye movements, smoking, 175
 Somatostatin, depression and drug dependence, 135
 SPECT, cocaine, 377
 Spontaneous activity, quinpirole sensitivity after cocaine, 223
 Startle reflex, clozapine, 50
 Stress
 cocaine, 385
 sertraline and alcoholism, 431
 Striatum, corticotropin-releasing factor, 492
 Stroke, cocaine, 377
 Substance abuse, prefrontal lobe, 243

T

Tachycardia, cocaine, 263
 Thyroxine, depression, 444
 Tobacco

addiction, 456
schizophrenia, 175
Tryptophan, sleep effects, 112

V

Ventral pallidum, antipsychotic agents, 352

Ventral tegmental area, cocaine, 26
Vulnerability, dexamethasone-CRH test
with affective disorders, 253

W

Water abuse, chronic, enalapril and

clonidine, 272
WAY 100,135, pindolol effects, 395
WAY-100635, behavioral effects, 339
Withdrawal, depression and drug
dependence, 135
