

effectively with water molecules, and uncharged polymers are strongly adsorbed.

Carbon and Graphite Group

A CARBON and Graphite Group has been created by the Institute of Physics and the Physical Society. The aim of the new Group is to provide a meeting-ground for physicists who are interested in carbon and graphite materials, and to collaborate with similar groups in sister societies, in order to further the work of an informal group which has been meeting regularly in London. The meetings are expected to interest theoretical physicists and those working with these materials in industry, academic institutions and Government laboratories. Joint meetings with other societies on topics of common interest are also envisaged. Prof. A. R. Übbelohde and Dr. G. S. Parry have been appointed chairman and honorary secretary, respectively, of the provisional Committee, and the remainder of the members who signed the request for the formation of the Group will be invited to serve on it. It is anticipated that the first elected Group Committee will be nominated and elected by the Group members in the summer of 1966. Further information regarding membership of the Institute and Society and of its Carbon and Graphite Group can be obtained on request from the Registrar, Institute of Physics and the Physical Society, 47 Belgrave Square, London, S.W.1.

The Emmie Clough Scholarship

THE Royal Horticultural Society has announced that it is offering a scholarship provided out of a bequest from the late Mrs. Emmie Clough, to enable a girl to take a course of training in horticulture which would otherwise be beyond her means. The scholarship, valued at £380 a year, will commence in September 1966. It will be open to women between the ages of eighteen and thirty, and will be tenable for two years at Waterperry Horticultural School, Nr. Wheatley, Oxford. Candidates will be required to have attained a standard of education which will permit them to take full advantage of the course of study, and should normally have completed or be prepared to undertake such periods of practical training in horticulture as may be considered necessary. Further

information can be obtained from the Secretary, Royal Horticultural Society, Vincent Square, London, S.W.1.

University News:

London

PROF. W. MORRIS-JONES, professor of political theory and institutions in the University of Durham, has been appointed director of the Institute of Commonwealth Studies and professor of commonwealth affairs from January 1. Dr. G. S. W. Organe has been appointed to the chair of anaesthetics, tenable at Westminster Medical School. The following readers have also been appointed: Dr. S. Rosenblat (theoretical mechanics, tenable at the Imperial College of Science and Technology); Dr. J. S. Tooms (applied geochemistry, tenable at the Imperial College of Science and Technology). The following titles have been conferred: *Professor*, Dr. H. Spencer (morbid anatomy, in respect of his post at St. Thomas's Hospital Medical School); Dr. J. W. Smith (chemistry, in respect of his post at Bedford College); *Reader*, Dr. T. J. Chandler (geography, in respect of his post at University College); Dr. J. R. May (bacteriology, in respect of his post at the Institute of Diseases of the Chest).

Announcements

MR. H. WILLIAMSON (Canada) has been appointed chairman of the Executive Council of the Commonwealth Agricultural Bureaux in succession to Mr. C. S. McMorris (Jamaica) as from January 1, 1966. Mr. J. A. Afari (Ghana) has been appointed vice-chairman, from the same date.

A SYMPOSIUM on "The Distribution and Biochemistry of Latex in Plants", organized by the Phytochemical Group, will be held in the School of Pharmacy, London, on January 6. Further information can be obtained from Mr. A. H. Williams, Research Station, Long Ashton, Bristol.

A MEETING on "Management Control and Computers", arranged by the Central London Productivity Association, in association with the British Productivity Council, will be held in London during December 9-10. Further information can be obtained from Mr. L. Fuller, Arthur Andersen and Co., St. Alphage House, 2 Fore Street, London, E.C.2.
