

PROJECT LEADER (experienced in information work and/or any scientific discipline) to develop, operate and evaluate specialized information services in association with the Department of Fuel Science, The Houldsworth School of Applied Science—The Registrar and Secretary, The University, Leeds, 2 (November 7).

RESEARCH SCIENTIST (with a Ph.D. degree in chemistry or physics together with some research experience, preferably in the general field of spectroscopy or postgraduate research experience of equivalent standard and duration, supported by satisfactory evidence of research ability) in the Division of Chemical Physics, Commonwealth Scientific and Industrial Research Organization, David Rivett Laboratory, Clayton, Melbourne, to undertake research in the field of atomic absorption spectroscopy—Chief Scientific Liaison Officer, Australian Scientific Liaison Office, Africa House, Kingsway, London, W.C.2, quoting Appointment No. 582/15 (November 11).

ANALYTICAL CHEMIST at the Australian National University to assist in the isotopic dating of rocks—The Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London, S.W.1; and The Bursar, Australian National University, Box 4, P.O. Canberra, A.C.T., Australia (November 30).

AGRICULTURAL STATISTICIAN for duties concerned with the planning of experiments and technical surveys and the analysis of the results obtained from these scientific investigations—The Establishment Officer, Potato Marketing Board, 50 Hans Crescent, Knightsbridge, London, S.W.1.

CHAIR OF ENGINEERING MATHEMATICS—The President, Nova Scotia Technical College, P.O. Box 1000, Halifax, Nova Scotia, Canada.

GRADUATE CHEMIST (preferably with previous experience with an automatic analyser) for research into the development of new techniques—The Director, Central Public Health Laboratory, Colindale Avenue, London, N.W.9.

MICROANALYST (experienced in organic elemental analysis of materials containing hetero-elements and capable of developing conventional and instrumental methods) in the DEPARTMENT OF CHEMISTRY to be in charge of the Microanalytical Laboratory, with one assistant—Head of the Chemistry Department, Sir John Cass College, Jewry Street, London, E.C.3.

QUALIFIED PHYSICAL CHEMISTS to undertake research in inorganic thermochemistry and thermodynamics, and on vapour phase reactions partly at high temperature—The Director of Research, Fulmer Research Institute, Stoke Poges, Bucks.

RESEARCH ASSISTANT IN THE DEPARTMENT OF BIOCHEMISTRY for work on the intermediary metabolism of invertebrates—Prof. E. Baldwin, University College London, Gower Street, London, W.C.1.

RESEARCH ASSISTANT (with a good degree in botany or horticulture) in the DEPARTMENT OF HORTICULTURE and A.R.C. UNIT OF FLOWER CROP PHYSIOLOGY, for investigation of the development physiology of the carnation—Prof. O. V. S. Heath, F.R.S., University of Reading, Horticultural Research Laboratories, Shinfield Grange, Shinfield, Reading, Berkshire.

RESEARCH PHYSICIST (preferably with a higher degree and relative experience) in the PHYSICS DEPARTMENT, to undertake investigation of electron scattering using 400 kV electron diffraction camera with recently constructed energy analysis facility—The Assistant Bursar (Personnel), University of Reading, Reading, Berkshire.

RESEARCH STUDENT (recent graduate, with a good honours degree in physics, engineering or a related subject) in the DEPARTMENT OF APPLIED PHYSICAL SCIENCES to work on the elastohydrodynamic lubrication of gears and roller bearings—The Assistant Bursar (Personnel), University of Reading, Reading, Berkshire.

RESEARCH TECHNICIAN (with one or more "A" level passes including biology, or equivalent qualification, and preferably laboratory experience in sterile techniques) in the CELL CULTURE LABORATORY—The Secretary, Christie Hospital and Holt Radium Institute, Manchester, 20, quoting Ref. 6169.

RESEARCH WORKER (with a good honours degree or its equivalent in biochemistry, and preferably an interest in purification methods as applied to protein hormones, or experience in immunochemistry) in the PHYSIOLOGY DEPARTMENT, to study prolactin with special reference to its assay in human body fluids—The Secretary, National Institute for Research in Dairying (University of Reading), Shinfield, Reading, Berkshire, quoting Ref. 66N/31.

SENIOR LECTURER (with an honours and a research degree) in INORGANIC AND RADIOCHEMISTRY—The Registrar, Regional College of Technology, Leicester.

SENIOR RESEARCH FELLOW (with training and experience in related research, and preferably with a Ph.D. degree) in SOCIOLOGY in the School of Humanities and Social Sciences, to undertake research into the impact of technical change on manual workers—The Secretary and Registrar, Bristol College of Science and Technology, Ashley Down, Bristol, 7, quoting Ref. 66/97.
