The authors have identified an error on the x-axis of Figure 1. The correct figure is reproduced below.

The authors apologise for any inconvenience this might have caused.

Figure 1 (a) Different C-RAF expression in the three patients (p1–3) in granulocytes, myeloblasts and RNA isolated in the PAXgene blood RNA system. Blast percentage was 98% in p1, 70% in p2 and 20% in p3, respectively. (b) Serial dilution experiment. Pure blast cell RNA of patients showing differences in C-RAF expression in blasts and PAXs (p2 and p3) was serially diluted with granulocytic RNA of the same patients and subjected to expression analysis.
