

DENTAL CHAIRS & DELIVERY SYSTEMS

Henry Schein suites

Henry Schein is delighted to have been chosen by Ora Dental Group as the wholesaler to supply the new dental suites in Selfridges, London. Along with KaVo Dental, Henry Schein will provide the suites' imaging equipment and sundries.

Henry Schein will also be installing the brand new ViperSoft imaging software. Henry Schein claims ViperSoft is the very latest in imaging software enabling simulations of dental treatments and storage of digital radiographs and intra oral images.

ViperSoft is new to the UK market and exclusive to Henry Schein. For more information phone 08700 10 20 41.

Paradigm tidy up

Paradigm manufacturing is pleased to announce the new Task Bin system. It allows groups of small components to be stored just outside the clinical area.

Paradigm claims the task bin allows dentists or nurses to be able to retrieve items quickly and efficiently when required and can be placed in their rightful place just as easily.

The Task Bins can be taken out of the storage cabinet and taken into surgery where all the items are collected and slotted into a chairside drawer. Paradigm claims this simple but effective approach enhances the working environment.

For more information phone 01278 792333.

Dental Man pack it in just snugly

The New DentalMan Mobile Compact Unit is self-contained in a back-pack and is complete with flexible mounted instruments for instant use. This innovation provides total dental surgery freedom.

It is based on the DentalMan Compact Unit, which itself is an alternative to the traditional dental surgery. Weighing a total of just 13 kilos, the unit is driven either by its own high-powered battery technology or from the mains. DentalMan claims it is rechargeable during operation; self-contained water supply; integrated compressor (2.2 bar with a sound level of <50 db); easy to unpack and repack. All DentalMan Cordless instruments can be connected to all Dentalman products.

The DentalMan Backpack can be used for home care, geriatric care, in the armed forces and for veterinary use. For more information phone 01844 213 399.

Voyager goes where no one's been before...

Voyager-II L is the dental system for the 21st century. Its unique control system and cuspidor can be pivoted either side of the dental chair. This enables either a left or right handed dentist or surgery assistant to work effectively.

The new flexi-arm with assistant's instrumentation also ensures perfect single or four-handed use. Effective infection control is paramount and the porcelain bowl has been designed with this in mind. For more information visit the website at www.takara.co.uk.

Compressed air from Dentalair UK

Dentalair UK believes one of the most significant and frequently overlooked sources of wear and tear on equipment is the compressed air supply.

Dentalair UK only supplies clean dry air. Dentalair claims it uses quality oil-free compressors and filter systems to ensure its systems are up to this task.

Dentalair UK deals direct with its clients and offers a unique service. This service consists of a detailed site survey followed by installation of a bespoke system and a comprehensive service support package. Dentalair's service support agreements typ-

ically run for a five-year period, though shorter periods are available, offering the practice all the benefits of the dentalair support package.

Saddle style comfort from Bambach

The Bambach Saddle Seat was designed by Mary Gale, a keen horsewoman, using the principles of the horse rider's position in the saddle.

Bambach claims the saddle seat supports the spine to provide an upright posture and still allows freedom of movement to the shoulders. In this position the spine is free to assume its natural curve, helping balance and relieving back pain. Users are encouraged to sit straighter and taller, in effect uncurling the body.

The design of the seat allows great versatility in use. The height is adjustable, enabling the sitter's feet to remain firmly on the floor with legs placed apart to give

stability to the pelvis. The seat itself is on castors, which provides the dental team with the mobility they require. For information on the Bambach Saddle Seat call 0208 7877051.

Minerva Dental Chairs & Delivery systems

Minerva Dental Ltd is offering a wide choice of chairs and delivery units from various manufacturers. These can all be seen on show at the five regional centres in Cardiff, Bristol, Christchurch, Manchester and Hull.

The orbit range includes the Asepsis concept Model 420A and Euro concept Model 420E (pictured). Each is an all round performer which is suitable for both right and left-handed operators.

All concepts come with an on board clean water system, a touch pad to control chair movement together with a foot control for hands free operation. The delivery system is equipped with a 3 in 1 syringe and 3 automatic outlets.

Other important features include the orbit 443 cuspidor, which has a timed bowl rinse and cup filler and a high volume evacuator. The LuxStar lights have an automatic on/off and a choice of 3 light intensities. For further information on the range of chairs and delivery systems call 02920 490504.
