

TRADE NEWS

Please send trade news information and illustrations to Terry Mordecai at the BDJ, 64 Wimpole Street, London W1G 8YS. Trade news is supplied as a service to the reader and does not imply endorsement by the BDJ. Normal and prudent research should be exercised before purchase or use of any product mentioned.

Switch go to Maestro

The Switch card and MasterCard International is pleased to announce that the Switch debit card brand has migrated to Maestro.

Most Switch cards already carry the Maestro logo on the reverse enabling them to be used at cash machines and shops, however many cardholders are unaware of this facility and the move is aimed to simplify and clarify the issue with one recognisable brand.

The migration of the brand will take immediate effect and will be completed by mid 2007. In the early stages, most cards and shop windows in the UK will carry both the Switch and Maestro logos and then gradually the Switch brand will be withdrawn. **Reader response number 52**

Busch to pre-clean

Busch is pleased to announce the launch of the Prophylaxis Polishing set 5920. The Prophylaxis 5920 is for tooth cleaning and prophylaxis, contouring and/or polishing of existing fillings. The set includes instruments to specifically carry out both treatments on all filling materials.

Busch claims the fine carbide finishing-burs enable contouring of all fillings. Metal fillings are pre-polished with the brown pre-polisher and the green high-lustre polishing is prepared on composite with the grey pre-polisher.

Cardozo launch the E100 forcep kit

Cardozo is running a special promotion until December on a range of Carl Martin Instruments. Carl Martin, has a worldwide reputation for top quality, precision dental instruments and has just launched the E100 forcep kit. The kit contains 10 forceps catering for incisors, premolars, molars and wisdom teeth in the upper and lower jaws.

The beaks of the forceps are slim and adapted to the anatomical form of the tooth while the handles' ergonomics design ensures comfort and complete control. Each pair of forceps is manufactured from the stainless steel material - DIN 1.4021 free of nickel, vacuum tempered, absolutely corrosion-resistant and suitable for all types of sterilisation.

Cardozo claims the Teflon joint is unaffected by sterilisation and will give years of smooth operation. Each pair of forceps is given a polish finish that is absolutely corrosion resistant. The forceps carry a Carl Martin guarantee. For more information phone 01494 773010.

Durr's Sanitising Suction Systems

The Orotol range from Dürr Dental is a leading brand of suction disinfectant. It boasts an extra-ordinary cleaning power and is foam-free making it popular with nurses. Dürr Dental the suction range is available as either a concentrated powder or as a liquid, both of which have an environmentally friendly composition and a pleasant odour.

Orotol is just one of a range of hygiene products made by Dürr Dental. All are conveniently colour coded

to identify each products application - blue for instruments, green for surfaces, pink for skin and hands, and yellow for special areas such as suction systems and amalgam separators.

If you would like more information please call obligation on 01933 671990. Alternatively visit the website www.duerr.uk or send an e-mail info@duerruk.com.
