

# DENTAL CHAIRS AND DELIVERY SYSTEMS

## Dental Directory

A comfortable and reliable operating chair is a prerequisite for a relaxed working environment. One name synonymous with chair quality and reliability is Belmont. The 037 PRO II, 039 PRO, Clesta, and Progres chairs are all of the highest specification.

Dental Directory claims the Progres, for example, represents good value for money. It has three preset positions operated by the foot control giving simple and accurate patient positioning, and is designed to simulate an individual's natural body movement.

For more information on any of these products phone 0800 585585.

## The new Gulliver

Anthos is pleased to announce the launch of the Gulliver Millennium dental unit. Ergonomically designed with the help of dentists and nurses, Anthos claims it is the perfect blend of Italian style and clinical excellence. Available in seven colours, its design and quality create a modern, stylish image in any practice.

Anthos claims the Gulliver Millennium's control is quick and simple, and movement smooth and precise. For infection control, the equipment is designed for easy cleaning.

The equipment is available in a Continental version for working in the 9 to 12 o'clock positions, and an International version, which is ideal for the 11 to 12 o'clock positions.

For more information call 01268 733157.

## Dürr launch the two surgery suction system

Dürr Dental is pleased announce the launch of the VS600 two-surgery suction system. The suction unit is a pre-requisite for a relaxed and hygienic working environment as constant interruptions for rinsing are a distraction for patients and practitioners alike.

Dürr claims the VS600 two-surgery suction system features a new carbon fibre impeller system that allows the motor to have an extremely fast start-up and low running current, as well as increasing the motor's ability to resist corrosion should a foaming substance accidentally enter the impeller. The VS600 also has an advanced non-return valve for the waste system that allows the engineer to circumvent virtually any installation problem.

Dürr also claims the system will provide the correct level of suction to run two surgeries comfortably, since it has the power to provide at least three hundred litres per minute of vacuum flow per surgery. For more information phone 01933-671990.

## High speed curing at a price you can afford

Grafton claims that high speed curing is at the top of the wish list for most dental practices, however affordable, rapid curing technology has not been available until now. Grafton have introduced a 5-second curing system that combines the power and features required in a great curing light; high intensity and for speed.

Other features include: a broad spectrum to cure all composites; ergonomics for simplicity and comfort; modes and timers that work best for the procedure; light meter to verify performance; digital display to verify mode, time and intensity.

For further information on this or any Grafton products phone free on 0800 581303.

## The Fedesa Carisma from Henry Schein

Henry Schein offers an extensive range of dental equipment from leading and highly respected manufacturers, including among many others, such names as Dentsply and Takara Belmont.

Included in the Henry Schein range is the popular Fedesa Carisma. Henry Schein claims their policy is to always offer value for money products, which do not compromise on quality, and the Fedesa Carisma chair package is no exception.

The Fedesa Carisma has been sympathetically designed for ease of use, enhancing the quality of the dentist's day; with chair height adjustment from 440mm to 810mm, lift capacity at 200kg with the choice of foot or keypad controls, allowing convenient access and maximum comfort for both dentist and patient. For more information phone 08700 10 20 41.

## The all-in-one chair from KaVo

KaVo is pleased to announce the launch of the new KaVo Primus 1058 TM/S treatment unit. The chair comes with a 3-function

syringe tubing and a KaVo multimedia ERGOcam 3a intraoral camera that attaches to the dentist's element.

The Primus 1058 also comes with a Flat screen for good picture quality. Also fitted in to the unit is the KaVo Hydroclean for automatic cleaning of the suction system with fresh water.

The unit also offers an offset backrest articulation axis to combat the "stretching effect". For continuous disinfections the unit is fixed with quality assurance of cooling and spray liquids.

For more information phone the KaVo customer services operators on 0800 218020.

## More chairs and stools from Support Stool

Support Stool aims to change the way that dental teams sit in the surgery. Commonly, dentists and dental nurses perch on the edge of the stool causing pressure on the coccyx and forcing the lower back into a 'slump' position.

Support Stool claims the stool forces dentists or nurses to sit correctly and allow them to maintain good posture - even when they are leaning forward.

The company also claims the stool can be upholstered to match any dental brand colour or any surgery design that dentists may have.

For more information on these products or a demonstration contact your Dental Equipment dealer or call Support Stool on 01296 581764
