

Super clean

Visitors to stand N05 will be able to see compressed air suppliers, Dentalair UK's range of products.

This includes the latest range of compressors and the 'Squeaky-Clean' Disinfection Service.

Following installation, the entire system is disinfected from source to outlet, eliminating any potential source of infection and contamination.

Dental imaging at Dürr

Dürr Dental will be showing products such as dental air compressors, suction systems, amalgam separators, surgery cleaning and hygiene materials, x-ray processing systems, as well as digital imaging and intra-oral cameras.

The main focus on the stand this year will be the new digital scanner,

Vistascan, and the new cordless intra-oral camera, Vistacam CL. VistaScan introduces a totally new concept in x-ray image plate technology as it has short reading times (20 seconds for intra-oral, 32 seconds for panoramic and 38 seconds for cephalometric images) and can be used in normal room lighting, so no dark room is necessary.

The Vistacam CL is the new wireless optical system from Dürr Dental. The camera is around 100-130g in weight and with the handpiece approximately 200mm, it fits easily into the pocket.
