

Silicone heaven

Zhermack invite you to see the latest in silicone and alginate materials and enter in a draw for a weekend in Venice on stand N02. New this year is the upgraded Elite H-D+ impression system, the first addition silicone with nanotechnology which enhances sulcans detail. Also, on show will be the 'The Dental Advisor' award winning Occlufast Rock bite registration silicone.

As well as extra fast and chrome alginates, check out the non-gagging, colour changing alginate with an irresistible tropical mango flavour.

Talks programme

Dental Protection will be presenting a series of talks each day at the exhibition.

The programme will cover a range of topics to assist both the general practitioner as well as more specific areas within dentistry. All the talks will qualify for verifiable CPD.

The talks will be held at the NEC in Griffin Suite 9 and with limited seating capacity available, individuals are advised to pre-book a seat. For further information contact laura.miles@mps.org.uk.

Keep on smiling

Smile-on stand M12a has a variety of courses and programmes available for the dental team.

Its latest offering, Clinical Audit Made Simple, was developed with Denplan to help dentists fulfil their NHS statutory requirements.

Smile-on will also be showing its NVQ for nurses training package. The Smile-on programme delivers the underpinning knowledge for the 14 units required for NVQ level 3.

There are also over 17 hours of verifiable online CPD. Courses cover clinical and business subjects.

Print the coupon from Smile-on's website, www.smile-on.com, to receive a £5 reduction on any of our learning products that you buy at the Show.

Infection control centre

Alkapharm, Ansell Healthcare and Prestige Medical have joined forces to create an 'Infection Control Centre' for the 2003 Dental Showcase Exhibition on stand C11.

Alkapharm's professional cleaners, disinfectants and sterilants are specifically designed for use on dental surgery applications. All products undergo extensive trials to ensure that they are not only highly effective but also appropriate for everyday use in a dental practice.

All Ansell Healthcare's ranges of latex and synthetic gloves are presented in a range of thicknesses to offer appropriate levels of protection, durability and comfort, and the choice between latex or a synthetic material affords a simple solution to the problem of allergy prevention.

Prestige Medical offers a range of autoclaves to cater for all GDPs dental surgery requirements and backs up its products with exceptional customer service, support and after care.
