Introducing MirroScope™

MirroScope™ from Henry Schein is an innovative new dental instrument that combines the best qualities of a traditional 30° dental mirror and a digital camera. The camera's lens is mounted in a tiny, 1 mm uncovered zone in the centre of the mirror, with the camera itself inside the mirror's handle. A set of powerful white LEDs illuminate the work area and display it on a monitor at up to 30 x magnification while you work. No more leaning over patients wearing heavy loupes! MirroScope™ allows you to work in a more comfortable position.

The MirroScope™ comes in two versions, the View 300 (with monitor) and the Pro 200 (without monitor). Ideal for facilitating a wide range of dental procedures, MirroScope™ is also a valuable training aid. For more information call Henry Schein on 08700 10 20 43.

Benchmark DAMAS registration

1st Dental Laboratories is delighted to announce that Benchmark Laboratory in Chinnor, Oxfordshire has successfully met the stringent quality assurance requirements of the Dental Appliance Manufacturers Audit Scheme (DAMAS).

DAMAS provides practitioners with reassurance that the work the lab performs on behalf of them and their patients will reflect unbeatable quality standards. It is proof that this lab abides by all UK regulations relating to lab work and the production of dental appliances.

Managing Partner, Sharon Bursill, feels that DAMAS provides dentists with the confidence of a quality controlled service. 'Our sole aim is to meet our clients prescription requirements through a combination of the highest skilled technicians complimented by our personal and professional service. DAMAS reiterates our commitment to best practice,' she said. For further information contact Benchmark Dental Laboratory, Chinnor on 01844 350056.

Rent your compressor

Compressed air equipment specialist Thorite has announced a new compressor rental plan, designed to ensure that dental practices in the north of England can meet all the health and safety requirements as laid down by HTM 2022, at the lowest possible cost. Thorite's Dental Air Plan is a five-year compressed air equipment rental package costing less than £35 per surgery per month for a typical three surgery dental practice.

The Dental Air Plan includes the latest whisper-quiet Jun-Air compressor and dryer, specially configured to comply with HTM 2022 and supplied, installed, piped up and commissioned. All service, repair, breakdown costs and regular inspections are included and the equipment is covered by an unlimited warranty. A rapid response telephone hotline is also available to all Dental Air Plan customers. For more information contact Ross Gowler on 01274 663471 or visit www.thorite.co.uk.

Roll away at composites

The brand new CompoRoller from KerrHawe is an innovative instrument designed to give absolute control in the layering and contouring of direct composite restorations. The CompoRoller's tips have a unique rolling action that contours composites quickly in thin and even layers, resulting in less time spent finishing and polishing. The non-stick rollers ensure bubble-free restorations with no 'pull-back' and allow the practitioner to place composite in the thinnest possible sections – particularly useful around margins.

The disposable rollers are available in two shapes: cylindrical for flat-surface contouring and a conical shape for occlusal surfaces, modelling and shaping. The CompoRoller assorted kit comes with one handle, 25 cylindrical tips and 25 conical tips for just £32 plus VAT.

For a limited period, KerrHawe are giving away a FREE Premise Mini-Kit with each CompoRoller purchased. For further information contact KerrHawe on 01733 892292.
