

Forthcoming evidence-based courses and conferences

2005

21–23 March

Oxford Workshop on the Practice of Evidence-based Medicine/
Mental Health
Oxford, UK

The workshop, to be held at St Hilda's College, is intended to serve as an introduction to evidence-based medicine. It is aimed at clinicians and other healthcare professionals who wish to gain knowledge of critical appraisal and experience in the *practice* of evidence-based healthcare.

Further information can be found at www.cebm.net/courses.asp

4–8 April

Randomised Controlled Trials Course: a Guide to Design, Analysis,
Interpretation and Reporting
Oxford, UK

This course, again held at St Hilda's College, provides a thorough grounding in the principles and practice of randomised clinical trials for the evaluation of healthcare interventions. It will include talks and workshops to give guidance on the methodology of trials using a problem-based learning approach.

Further information can be found at www.cebm.net/courses.asp

9–11 May

Evidence-Based Dentistry in Practice
Manchester, UK

Further information on this Cochrane Oral Health Group meeting can be found at www.cochrane-oral.man.ac.uk/ebp.course.htm

9–13 May

6th Oxford Course in Evidence-based Dentistry
Oxford, UK

This course will be held at the Oxford University Department of Continuing Education, at Rewley House.

Further information can be found at www.conted.ox.ac.uk/cpd/healthsciences/courses/short_courses/Evidence_Based_dentistry/

20–22 June

Health Technology Assessment International (HTAi) Annual Meeting: Bringing HTA into Practice
Rome, Italy

The 2nd Annual Meeting of HTAi will focus on the role of HTA in technological innovation processes, addressing key questions such

as, "What are the appropriate instruments, necessary skills, and useful partnerships?"

For further information, contact Marco Marchetti or Americo Cicchetti at infouvt@rm.unicatt.it

22 June

One-day Workshop on Evidence-based Medicine
Oxford, UK

This course will be held at the Oxford University Department of Continuing Education, at Rewley House. Further information can be found at www.cebm.net/courses.asp

5–9 September

Oxford Workshop in Teaching Evidence-Based Medicine/Mental Health
Oxford, UK

This workshop at St Hilda's College is aimed at clinicians and other healthcare professionals who already have some knowledge of critical appraisal and experience in the practice of evidence-based healthcare and who want to explore issues around *teaching* it. The workshop is not intended to serve as an introduction to evidence-based medicine itself.

Further information can be found at www.cebm.net/courses.asp

The Oxford Master's Programme in Evidence-Based Healthcare

The programme includes three part-time award bearing courses: a Postgraduate Certificate, a Postgraduate Diploma and an MSc. The aim of the Postgraduate Certificate Programme is to help health professionals become good "consumers" of health research, by giving them the skills to find evidence, appraise evidence, and use evidence to make clinical and health management decisions. The Postgraduate Diploma and MSc levels focus on developing research skills. A work-study approach to learning is used, where health professionals identify relevant research issues within their work environment, and use the structure of the Diploma and MSc modules to design research projects which can generate evidence for healthcare. There is a minimum attendance requirement of 70% for each of the taught components on each course.

Further information is available at www.conted.ox.ac.uk/health/htmlfiles/master/masterfr.htm
