

# Forthcoming evidence-based courses and conferences

## 2015

### 3-7 October

Cochrane Colloquium, Vienna, Austria

### 28-31 October

7<sup>th</sup> International Conference of EBHC Teachers and Developers,  
Taormina, Italy

Further information is available at <http://www.ebhc.org/>

### 3-4 November

ADA - Evidence-based Champions Conference  
Washington, DC, USA

Further information is available at <http://ebd.ada.org/en/education/courses/ebd-champions-conference>

### 16-18 November

CASP 3-Day Train the Trainer Course  
Kellogg College, Banbury Road, Oxford, UK

Further information is available at <http://www.casp-uk.net/#!train-the-trainer/cw0d>

### 20 November

Introduction to Evidence-Based Medicine  
Rewley House, Wellington Square, Oxford, UK

Further information is available at <http://www.cebm.net/education-and-training/introduction-evidence-based-medicine/>

## 2016

### 11-15th January

ADA/NYUCD Advanced Evidence-Based Dentistry Workshop  
NYU College of Dentistry, New York City

Further information available at  
<http://ebd.ada.org/en/education/courses/advanced-evidence-based-dentistry-workshop>

### 22-24th June

Evidence Live 2016  
University of Oxford, UK

Further information is available at <http://evidencelive.org/>

## Cochrane Workshops

Details of workshops organised by the Cochrane Collaboration in a range of locations across the world are listed on the web at <http://www.cochrane.org/tags/news-events/workshops>

## Oxford International Programme in Evidence-based Health Care, MSc in Evidence-based Health Care

This is a joint programme from Oxford University's Continuing Professional Development Centre and Department of Primary Health Care. It is offered as a part-time course consisting of six taught modules and a dissertation. The flexible structure of the course has been devised to fit with the structure of specialist training and to accommodate student choice.

The modules from the International Programme in Evidence-based Health Care can be taken as stand-alone short courses.

Available modules are:

- The Practice of Evidence-based Health Care (compulsory for MSc)
- Introduction to Study Design and Research Methods (compulsory for MSc)
- Clinical Epidemiology and Decision Making (Evidence in Practice)
- Ethics in Health Care
- Evidence-based Change
- Evidence-based Dentistry
- Evidence-based Diagnosis and Screening
- Further Practical Statistics
- Patient-based Evidence
- Qualitative Research Methods
- Randomised Controlled Trials
- Statistics for Health Researchers (online)
- Systematic Reviews.

For further information visit the website at <http://www.conted.ox.ac.uk/courses/professional/staticdetails.php?course=210>

## MSc in Evidence for Public Policy and Practice

Evidence for Policy and Practice Information and Co-ordinating (EPPPI) Centre, Social Science Research Unit, Institute of Education, London

This MSc has been designed for graduates and policy-makers, practitioners, managers and researchers who want to become more skilled in systematic reviewing and develop a critical understanding of the relationships between research evidence and public policy and practice. Students will be encouraged to build their studies around their own areas of interest. These could relate to social welfare, education, crime and justice, transport, health and health promotion, housing or any other area of social policy or practice. This degree can be completed in one year full-time or over two years part-time. Core course modules are delivered in four full-day sessions, one week apart. These modules can be taken as short courses without accreditation.
