

Consultation on updated guidance from SDCEP

A draft of the Scottish Dental Clinical Effectiveness Programme's (SDCEP) updated guidance on the *Prevention and Management of Dental Caries in Children* guidance is now out for consultation. The original guidance document was published in 2010 and is well respected and is widely used in and beyond Scotland. The original guidance document (available at <http://www.sdcep.org.uk/published-guidance/caries-in-children/>) was designed to assist and support Primary Care practitioners and their teams in improving and maintaining the oral health of their child patients from birth up to the age of 16. Based on information distilled from a range of sources, the guidance provides advice on the assessment of the child

- the delivery of preventive care based on caries risk
- choosing from the range of caries management options available
- delivery of restorative care, including how to carry out individual treatments

- recall and referral
- providing additional support
- management of suspected dental neglect.

The consultation runs until the 18th August 2017 and the draft document and feedback form are available at <http://www.sdcep.org.uk/in-development/prevention-and-management-of-dental-caries-in-children-update/>

Corrections and clarifications

In vol 18.1 the letter to the editor was not correctly titled on the contents page of the journal and should be referenced as:

Afrashtehfar KI, Brägger U, Treviño-Santos A, de Souza RF. There is a need for clinical studies comparing pressable and machinable lithium disilicate restorations. *Evid Based Dent* 2017; **18**: 2.
