Part way through the discussion section, the text
was published incorrectly.

The correct text is shown here.

In January 2005, the Department of
Health announced that over 130 000 patients
had received treatment for various operations
in IS-TCs, with mobile units having
performed 10 000 cataract operations at a
rate of 37 cataract operations per day, 6 days a
week.

The authors would like to apologise for this
mistake.
