SHEsis, a powerful software platform for analyses of linkage disequilibrium, haplotype construction, and genetic association at polymorphism loci

Yong Yong Shi, Lin He

Cell Research (2006) **16**:851. doi:10.1038/sj.cr.7310101; published online 16 October 2006

Correction to: (2005) **15**:97-98. doi:10.1038/sj.cr.7290272

The authors want to changed the web link of the software platform in this Briefing.

Page 97, section “INTRODUCTION”, the web link of SHEsis is changed from <http://www.nhgg.org/analysis> to <http://analysis.bio-x.cn>

The authors apologize for any inconvenience caused.
