No information is available.

Departments, Centres and Institutions Involved in Genetic Services**Major centres offering a broad range of genetic services**

Institut für Medizinische Biologie und Humangenetik, Universität Innsbruck – Humangenetische Untersuchungs- und Beratungsstelle

Pre- and postnatal cytogenetics, molecular cytogenetics, Molecular genetics, tumour cytogenetics, DNA analysis, biochemical genetics, dysmorphology/genetic syndromology, genetic counselling

Institut für Medizinische Biologie und Humangenetik, Universität Graz – Humangenetische Beratungsstelle

Pre- and postnatal cytogenetics, molecular cytogenetics, tumour cytogenetics, DNA analysis, biochemical genetics, dysmorphology/genetic syndromology, genetic counselling.

Centres offering restricted genetic services

Kinderklinik (Landeskrankenhaus Salzburg), Abteilung Klinische Genetik
Postnatal cytogenetics, molecular cytogenetics, dysmorphology/genetic syndromology, genetic counselling

St Anna Kinderspital Wien, Forschungsinstitut für krebskranke Kinder
Postnatal cytogenetics, molecular cytogenetics, tumour cytogenetics, DNA analysis

Wilhelminen-Spital Wien, Genetische Beratungsstelle
Pre- and postnatal cytogenetics, genetic counselling

Institut für Allgemeine Biologie, Universität Wien
Postnatal cytogenetics, molecular cytogenetics, tumour cytogenetics

Centres offering genetic services in special areas/diagnosis/ indications

Universitätsklinik für Pädiatrie, Universität Wien, Labor für Angeborene Stoffwechselstörungen

Biochemical genetics, newborn screening, DNA diagnosis of inborn errors of metabolism

Universitätsklinik für Psychiatrie, Allgemeines Krankenhaus Wien
Huntington disease

Österreichisches Zentrum für Screening, Zentrallabor, SMZO-Donauspital, Wien
DNA diagnosis

Klin. Abteilung für Neuropathologie und Neurochemie, Allgemeines Krankenhaus Wien

Metachromatic leucodystrophy, adrenoleucodystrophy

Institut für Anatomie, Universität Wien
Duchenne muscular dystrophy, Becker muscular dystrophy

Zentrallaboratorium und Blutbank, Krankenanstalt Rudolfstiftung Wien
Haemoglobinopathies, DNA diagnosis

Innere Medizin IV, Abtl. f. Gastroenterologie und Hepatologie, Allgemeines Krankenhaus Wien
Morbus Wilson, haemochromatosis

Klinisches Institut für Medizinische und Chemische Labordiagnostik, Allgemeines Krankenhaus Wien
DNA diagnosis, coagulation defects

Arbeitsgruppe f. Stoffwechselerkrankungen, Univ. Kinderklinik Graz
Inborn errors of metabolism

Klinisches Institut für Medizinische Chemische Labordiagnostik, Allgemeines Krankenhaus Wien
DNA diagnosis, complement defects

Stoffwechsellabor, Univ. Kinderklinik Wien
Inborn errors of metabolism

Innere Medizin I, Abteilung für Hämatologie und Hämostaseologie, Allgemeines Krankenhaus Wien
DNA diagnosis, coagulation defects

Centre for Human Genetics UCL

Cliniques Universitaires Saint-Luc, Brussels. Genetic counselling for prenatal and paediatric disorders, classical constitutional cytogenetics, molecular analyses of the most frequent diseases. Childhood leukaemias (with the Department of Paediatrics) – active member of the 'Groupe Français de Cytogénétique Hématologique' (GFCH). Special interest in paediatric and adult neuromuscular disorders. Follow-up of prenatal diagnosis >85% of pregnancies. Huntington disease (with psychiatric department) – French-speaking association founded. Prevention and genetic screening of familial medullary thyroid carcinoma (MEN2A), breast cancer and polyposis coli. Closely linked to the Academic Hospital in Brussels – masters and PhD study.

The Human Genetics Centre of the Free University of Brussels

Metabolic clinic, department of molecular oncology. Special interest of centre is identifying mutations in thyroid diseases. The primary aim of the centre is prevention, the secondary aim, early diagnosis. Neonatal screening for amino acid disorders (PKU, maple syrup urine disease, histidine, tyrosine and methionine disorders), hypothyroidism and galactosaemia. At-risk population screening for specific disorders (cystic fibrosis, fragile X, haemoglobinopathies, Tay-Sachs) before pregnancy or early pregnancy. Family studies follow carriers, all at risk have received genetic tests. Triple test for Down syndrome is more commonly performed by gynaecologists. Pilot population screening programmes for some specific disorders. The centre is responsible at the national level to the Superior Council for Genetics.

Institute de Pathologie et de Génétique

Only centre in Belgium NOT attached to a university. Large clinical genetics department. It covers a large area of French-speaking western Wallonia i.e. 5,200 km² with 1,100,000 inhabitants and 15,000 births per annum. Services are offered to 23 official hospitals through monthly or occasional clinical genetics consultations. Specialises in congenital malformations from pathological and epidemiological perspectives. Clinical evaluation and genetic counselling for mental retardation. Follow-up studies 3 years after initial genetic counselling via questionnaire to assess impact and middle-term effects. This is done by social workers and psychologists. 80,000 biopsy samples analysed annually – special service for cancer-prone families and a concerted molecular cytogenetic analysis of bone marrow and solid tumour specimens.

Human Genetics Centre of Liège

Genetic and biochemical services. Neonatal screening of metabolic diseases; approx. 17,000 newborns surveyed per annum. Same number screened for hypothyroidism and 21-hydroxylase deficiency. Screening programme for creatine phosphokinase and α_1 -antitrypsin covers approx 17,000 births. Quality control by the British Biochemical Society Programme. Triple test for Down syndrome using a maternal serum marker uses a specific technique with dried blood for 15,000 tests per year. Pilot programmes for screening pregnant women for cystic fibrosis and fragile X. Pregnant women tested annually in the general population are approximately 23,000/37,000 (estimation). After 4 years, the number of trisomic 21 births has been reduced by 66% in the region of Wallonia.

Human Genetics Centre of Leuven

Nine video programmes about genetic syndromes. One video programme with an introductory survey on genetics has been produced especially for education of the general public. Most institutes for mentally retarded patients in Belgium are visited regularly by physicians from the centre in Leuven and new patients are then selected for chromosomal or molecular investigations of the cause of mental retardation.

Workloads

Tests offered by the molecular genetics laboratory, National Centre for Medical Genetics, November, 1996

Disorder	Tests offered	Basis of test(s)
Duchenne/Becker muscular dystrophy	diagnostic deletion screen, carrier detection and prenatal diagnosis	multiplex PCR for deletions; linked markers; PTT for mutations
Cystic fibrosis	diagnostic mutation screen, carrier detection and prenatal diagnosis	direct mutation detection for the 11 most common Irish mutations
Fragile X syndrome	diagnosis, carrier detection and prenatal diagnosis	expansions by Southern blot and direct sizing of (CCG) _n repeat by PCR
Prader Willi syndrome	diagnosis	Southern blot for both deletions and disomy; microsatellite markers to distinguish the two
Angelman syndrome	diagnosis	Southern blot for both deletions and disomy; microsatellite markers to distinguish the two
Huntington disease	diagnostic testing	direct sizing of (CAG) _n repeat by PCR
Myotonic dystrophy	diagnosis, predictive testing, prenatal diagnosis	expansions by Southern blot and direct sizing of (CTG) _n repeat by PCR
Familial adenomatous polyposis coli	predictive testing	direct mutation detection, linked and intragenic markers
Hereditary non-polyposis colon cancers	diagnosis and predictive testing	direct mutation detection, linked and intragenic markers
Multiple endocrine neoplasia and associated RET disorders	diagnosis, predictive testing	direct mutation detection
Spinal muscular atrophies	diagnosis	deletion detection, linked markers
Silver-Russell syndrome and primordial growth retardation	uniparental disomy testing	microsatellite analysis of parents and child

Based upon the definition of a 'genetic centre' by Prof. R. Harris. No. 6–8 provide services on a national level (patients are referred from all regions of the country). As regards provision of prenatal diagnosis in the city and the province of Warsaw, they work on a regional basis.

Workloads

No information is available.

Patient Organisations

There are many patient organisations for different genetic disorders, such as Down syndrome, Turner syndrome, cystic fibrosis, mucopolysaccharidoses, tuberous sclerosis and neuromuscular disorders.

Portugal

Departments, Centres and Institutions Involved in Genetic Services

In Portugal it is impossible to know the exact number of workers in the field of genetics, but as far as the authors know the most relevant centres currently working in genetics are given here.

Serviço de Genética Médica

Hospital Egas Moniz, Ministry of Health, Lisbon

Clinical genetics, cytogenetics, National Registry of Congenital Anomalies
Staff: clinical genetics – 1, non-medical laboratory geneticist – 3, graduate – 1, technician – 2

Cytogenetic studies – 488 (including prenatal)

Patient clinics – 687

Centro de Metabolismos e Genética

Faculdade de Farmácia de Lisboa, Ministry of Education, Lisbon

Biochemistry, molecular genetics, teaching (biochemistry), research (inborn errors of metabolism)
Staff: paediatrician – 3, researcher – 19, graduate – 3, technician – 2

Biochemical Studies: 1,900

Unidade de Genética

Hospital D. Estefânia, Ministry of Health, Lisbon

Clinical genetics, biochemistry, pregraduate and postgraduate teaching

Staff: clinical geneticist – 1, paediatrician – 1, technician – 1

Biochemical studies: 422

Patient clinics: 3,350

Unidade de Genética

Serviço de Pediatria, Hospital Santa Maria, Ministry of Health, Lisbon

Clinical genetics and cytogenetics; pregraduate teaching (Faculdade de Medicina – Universidade de Lisboa) and postgraduate teaching

Staff: clinical geneticist – 3, technician – 2

Cytogenetic studies: 160 (peripheral blood)

Patient clinics: 735

Instituto Dr. Ricardo Jorge, Ministry of Health

Departamento de Genética Humana, Lisbon

Cytogenetics, molecular biology, research (carcinogenesis, mutagenesis, DNA repair, cystic fibrosis, blood disorders, sex differentiation disorders, chromosome aberrations)

Staff: researcher – 4, graduate – 4, technician – 5

Cytogenetic studies: 1,500 (including prenatal)

DNA samples: 518

Departamento de Genetica

Universidade Nova de Lisboa, Ministry of Education, Lisbon
Cytogenetics, biochemistry, molecular genetics, pregraduate teaching, research (mutagenesis, oncogenesis, cancer-prone genetic diseases)
Staff: medical laboratory geneticist – 4, non-medical laboratory geneticist – 19, researcher – 18
Laboratory studies: 150

Instituto Dr. Ricardo Jorge, Ministry of Health

Departamento de Biologia Medica, Lisbon
Biochemistry, molecular biology, teaching (postgraduate laboratory technicians), research (metabolic diseases, haemoglobinopathies), National Registry of Haemoglobinopathies
Staff: researcher – 3, graduate – 2, technician – 5
Haemoglobin studies: 3,816
Biochemical studies: 353
G6PD studies: 260

Consulta de Genetica

Hospital Pediátrico, Ministry of Health, Coimbra
Clinical genetics
Staff: clinical geneticist – 1
Molecular studies: 132
Patient clinics: 303

Serviço de Genetica Medica

Faculdade de Medicina da Universidade de Coimbra, Ministry of Education, Coimbra
Cytogenetics, molecular genetics and pre- and postgraduate teaching, research (fragile X, carcinogenesis)
Staff: medical doctor – 3 (1 clinical geneticist: J. Saraiva), technician – 1
Molecular studies: 1,432

Instituto de Biologia Medica

Faculdade de Medicina da Universidade de Coimbra, Ministry of Education, Coimbra
Cytogenetics, postgraduate teaching
Staff: clinical geneticist – 1, non-medical laboratory geneticist – 1, researcher – 1, graduate – 3, technician – 2
Cytogenetic studies: 614 (including prenatal)

Serviço de Genetica Medica

Faculdade de Medicina da Universidade do Porto, Ministry of Education, Porto
Clinical genetics, cytogenetics, molecular genetics, pre- and postgraduate teaching, research (cystic fibrosis, polycystic kidney disease)
Staff: clinical geneticist – 6, paediatrician – 2, medical laboratory geneticist – 3, non-medical laboratory geneticist – 3, graduate – 1, technician – 10
Cytogenetic studies: 1,433 (including prenatal)
Patient clinics: 2,065

Unidade de Genetica IPATIMUP

Faculdade de Medicina da Universidade do Porto, Ministry of Education, Porto
Cytogenetics, molecular genetics, pre- and postgraduate teaching, research (cancer cytogenetics and molecular biology, Prader-Willi, Angelman syndrome)
Staff: clinical geneticist – 1, medical laboratory geneticist – 5, researcher – 3, graduate – 3, technician – 2
Cytogenetic studies: 1,028
Molecular studies: 260

Instituto de Genetica Medica (IGM), Ministry of Health, Porto

Clinical genetics, cytogenetics, molecular genetics, postgraduate teaching, research (molecular and biochemical studies on metabolic diseases including mitochondrial diseases), National Newborn Screening Programme
Staff: clinical genetics – 2, paediatrician – 1, medical laboratory geneticist – 2, researchers – 5, graduate – 10, technician – 21
Cytogenetic studies: 1,418
Patient clinics: 3,185
Molecular genetics: 1,837
Enzymes: 9,501
Biochemical studies: 8,286
Newborn screening: 219,809

Laboratorio de Genetica Medica (ICBAS)

Universidade do Porto, Ministry of Education, Porto
Pre- and postgraduate teaching and research (Machado Joseph disease)
Staff: clinical genetics – 1, neurologist – 1, researcher – 6

Consulta de Genetica

Hospital D. Maria Pia, Ministry of Health, Porto
Clinical genetics, postgraduate teaching
Staff: clinical geneticist – 1
Patient clinics: 586

Centro de Genetica Clinica e Patologia, Porto (private)

Clinical genetics, cytogenetics, biochemistry, molecular genetics
Staff: clinical geneticist – 2, non-medical laboratory geneticist – 8
Cytogenetic studies: 1,190 (including prenatal)

Patient Organisations

Down syndrome, cystic fibrosis, neural tube defects, osteogenesis, haematological diseases, metabolic diseases, neuromuscular diseases and others. In recent years, genetic patients' organisations and the media have made an important contribution to education.

Workloads

Hereditary disorders locally common in Sweden

Autosomal dominant disorders	Autosomal recessive disorders	X-linked disorders
Adynamia episodica hereditaria – Mb Gamstorp S	Childhood deafness N	Fragile X syndrome N Nephrogenic diabetes insipidus
Acute intermittent porphyria – Mb Waldenström N	Charcot-Marie-Tooth disease N, S	
Amelogenesis imperfecta N	Congenital myotony – Becker type N	
Charcot-Marie-Tooth disease type 1a N	Epidermolysis bullosa hereditaria letalis – Mb Herlitz N	
Congenital dyserythropoetic anaemia type III N	Mb Gaucher type III N	
Congenital myotonia N	Haemochromatosis N	
Distal muscular atrophy – Mb Velander S	Hereditary fructose intolerance N	
Essential tremor N	Hereditary glucose-galactose malabsorption N	
Familial amyloidosis with polyneuropathy N	Infantile genetic agranulocytosis – Mb Kostman N	
Hereditary macular degeneration – Mb Best N	Olivopontocerebellar atrophy type III N	
Huntington disease N, S	Osteopetrosis N	
Hyperkeratosis palmaris et plantaris N	Progressive myoclonic epilepsy – Unverricht-Lundborg type S	
Myoclonic dystonia S	Sjögren-Larsson syndrome N	
Torsion dystonia N	Spinal muscular atrophy – Kugelberg-Welander N, S	

N = Northern Sweden; S = southern Sweden.

Number of clinical samples in the seven genetic laboratories in Sweden, 1996

Genetic centre	Gothenburg	Linköping	Lund	Skövde	Stockholm	Umeå	Uppsala	Total
<i>Cytogenetic analyses</i>								
Amniocentesis	994	482	1,042	158	2,320	341	422	5,759
CVS	92	12	26	39	144	37	233	583
Total prenatal	1,086	494	1,068	197	2,464	378	655	6,342
Blood ^a	953	135	639	221	992	505	558	4,003
Bone marrow ^b	–	–	379	75	404	341	372	1,571
Solid tumours	–	–	176	23	16	–	6	221
<i>Molecular analyses</i>								
Total ^c	441	–	228	79	612	415	668	2,443
Prenatal	29	–	12	–	40	–	32	113

^a Constitutional analyses.

^b Leukaemia/lymphomas.

^c Representing 68 different conditions.
