

Supplementary information

Zeng HL, Huang SL, Xie FC, Zeng LM, Hu YH, Leng Y. Yhhu981, a novel compound, stimulates fatty acid oxidation via the activation of AMPK and ameliorates lipid metabolism disorder in *ob/ob* mice. *Acta Pharmacol Sin* 2015; 36 (3): 343–52. doi: 10.1038/aps.2014.147.

The chemical name of Yhhu981 is 3-[(3,5-dihydroxyphenyl)ethynyl]-4*H*-chromen-4-one.

Add 1 **Keywords:** chromones.

Acta Pharmacologica Sinica (2015) 36: iii; doi: 10.1038/aps.2015.13
