TEPE GIVES SUGAR A POSITIVE SPIN

At BDIA Showcase TePe unveiled its new bio-based plastic toothbrush which has been made using sugar cane and castor oil. Sustainably produced in Sweden using 100% green energy, the toothbrush is the first in the TePe GOOD® range.

The use of renewable raw materials, such as sugar cane and castor oil, enables TePe to recirculate up to 95% of the CO₂ emissions during the product's life cycle. As with all TePe toothbrushes, the product is manufactured at TePe's Malmö factory, which has the largest solar power plant in the city.

Elaine Tilling, Head of Clinical Education at TePe UK, said

'The TePe GOOD® product range marks a milestone in our continued journey towards a more sustainable future. The introduction of our bio-plastic toothbrush offers an environmentally-sensitive

oral care solution that does not compromise on quality. This combined with our commitment to manufacture with 100% green energy marks another important step for us as we explore opportunities to become a more sustainable business.'

The TePe GOOD® toothbrush goes on sale to dental practices and surgeries in November 2018 and has a suggested retail price £2.75. For orders or more detail please contact your local dental wholesaler.

MASTER THE ART OF DECONTAMINATION

Creating a compliant decontamination process is an art form. Just as an artist has to decide how to apply light and shadow, and colour and texture, there are many facets that need to be considered to achieve complete compliance.

If you're struggling to master perfection, Little Sister can help. The Little Sister range of autoclaves, handpiece cleaner and oiler, reverse osmosis water system and essential testing products offer an effective, reliable and affordable solution for high-quality decontamination and peace of mind.

Plus, you get so much more included in the picture when you choose Little Sister, such as Lifetime Breakdown Protection, Care&Cover Protection, free installation and commissioning, and free validation and PSSR testing. So what are you waiting for? Master the art of decontamination with Little Sister. For more information on decontamination equipment and products from EschmannDirect, please visit www.eschmann.co.uk or call 01903 753322

FREE DENTAL IMPLANT EDUCATION ON DEMAND

The Association of Dental Implantology (ADI) is dedicated to supporting professional education. ADI webinars are free to view on demand for all ADI

members, each presented by renowned speakers such as Amit Patel, Aly Virani, Martin Wanendeya, Adrian Binney and Eimear O'Connell.

They cover a range of relevant topics including peri-implantitis, digital smile design, implants for periodontic patients, and digital planning for in-house milling of final restorations. Offering more than just clinical insight, there is even a webinar exploring the benefits of a hygiene-led team approach to implant and periodontal maintenance. ADI webinars are just one advantage available to members – find out more today.

For more information or to join the ADI, visit www.adi.org.uk/membership
