Inhibition of RelA phosphorylation sensitizes apoptosis in constitutive NF-kappaB-expressing and chemoresistant cells - Retracted -

SK Manna, P Manna and A Sarkar

Cell Death and Differentiation (2012) 19, 1572; doi:10.1038/cdd.2012.79**Correction to:** *Cell Death and Differentiation* (2007) 14, 158–170. doi:10.1038/sj.cdd.4401929.

The authors have made the following errors that they would like to correct.

Since the publication of the article the authors and editors have determined that incorrect pictures for Figure 3b and Figure 6b were incorporated by mistake. The figures below are the correct versions:

The authors apologize for these errors.

**Figure 3** P₃-25 induces apoptosis. (b) HuT-78 cells were treated with varying concentrations of P₃-25 or 5 μM BAY for 72 h and percentage of dead cells (red color) were counted using the 'Live & Dead' cell assay kit and indicated in mean percentage in bracket from triplicate assays**Figure 6** P₃-25 potentiates apoptosis mediated by chemotherapeutic agents. (b) HuT-78 cells were treated with 100 nM P₃-25 for 4 h followed by treatment with doxorubicin, taxol, or cisplatin (1 μM each) for 72 h. The number of dead cells (red color) were counted using the 'Live & Dead' cell assay kit and indicated in percentage in brackets**The 5th International p63/p73 workshop: much more than just tumour suppression**

Cell Death and Differentiation (2012) 19, 1572; doi:10.1038/cdd.2012.83**Correction to:** *Cell Death and Differentiation* (2012) 19, 549–550; doi:10.1038/cdd.2011.204

The 5th p63/p73 workshop, the International Agency for Research on Cancer, Lyon, France, September 12–14, 2011.

Since the publication of this paper the authors have noticed that the name of the second author was published incorrectly. The correct author list is shown above.

The authors would like to apologize for this error.

Retraction

Retraction: Inhibition of RelA phosphorylation sensitizes chemotherapeutic agents-mediated apoptosis in constitutive NF-kappaB-expressing and chemoresistant cells

SK Manna, P Manna and A Sarkar

Cell Death and Differentiation advance online publication, 1 March 2013; doi:10.1038/cdd.2013.18

Retraction to: *Cell Death and Differentiation* (2007) **14**: 158–170, Subsequent 'Corrigendum' in *Cell Death and Differentiation* (2012) **19**: 1572

The corresponding author wishes to retract the above paper for the reason that the images in some of the Figure panels in the paper could not unambiguously

be attributed in the laboratory notebooks. Thus, the results presented in this paper are not fully supported by the available laboratory records. All the authors have agreed to sign this retraction notice. We deeply regret this circumstance and apologize for any adverse consequences that this retraction might cause to the scientific community.
