Publishing in high-profile journals

Deborah J Sweet¹

¹*Developmental Cell and Cell Stem Cell, Cell Press, 600 Technology Square, Cambridge MA 02139, USA*

This presentation will outline the procedures involved in preparation, submission, review and publication of research manuscripts in high-quality, selective journals such as *Cell Stem Cell*. It will include an overview of points to consider before submission, an indication of the selection criteria used for publication, and information about how the different parts of the publication process are conducted by journal Editors. The overall aim is to provide information and guidance that will help researchers decide on an appropriate journal for their manuscript and navigate the submission process effectively.

Correspondence: Deborah J Sweet

Dr Deborah J Sweet is currently the Editor of two prominent biomedical journals, *Cell Stem Cell* and *Dev Cell*. She earned her BA from the University of Cambridge, UK, and her PhD at the MRC Laboratory of Molecular Biology, also in Cambridge. She then carried out postdoctoral

research at The Scripps Research Institute in La Jolla, California, USA. Dr Sweet began her publishing career in 1996 as the Editor of *Trends in Cell Biology*. She joined Cell Press in 1999, and before becoming the Editor of *Dev Cell* also worked as a Scientific Editor on *Cell* and *Mol Cell*. She was closely involved in the successful launches of *Dev Cell* (in 2001) and *Cell Metab* (in 2005), and was the launch Editor for *Cell Stem Cell* in 2007.
