Since the publication of this paper, the authors have noticed that there are missing brackets at the end of the equation on page 763.

The correct equation should read as follows:

$$t = (M_0 - M_t)/L - (1/Lk_2)\ln\left(\left(k_1 e^{-k_2 M_0} - L\right)/\left(k_1 e^{-k_2 M_t} - L\right)\right)$$
