

## RETRACTION

# Association between lutein intake and lutein concentrations in human milk samples from lactating mothers in South Korea

H Kim, T-J Bae, B-M Jung, H Yi, JA Jung and N Chang

*European Journal of Clinical Nutrition* (2017) **71**, 681; doi:10.1038/ejcn.2016.215; published online 26 October 2016

**Retraction from:** *European Journal of Clinical Nutrition* (2016) advance online publication 25 May 2016; doi:10.1038/ejcn.2016.84

The authors have requested that this paper be retracted due to an unexpected discrepancy in the data, which has led to an error in the published results. The authors believe that the discrepancy is a

result of improper handling or storage of standard material of lutein. As not enough of the human milk sample is left to carry out additional experiments, it has been concluded that the paper should be withdrawn.
