

Position Available

Geneticists: The Department of Human Genetics, Virginia Commonwealth University School of Medicine, invites applications for several tenure-eligible Assistant or Associate Professor positions. We seek exceptional candidates pursuing imaginative basic and/or clinical research in genetics. Applicants must have a Ph.D. and/or M.D. degree and two or more years of productive postdoctoral research experience. Assistant Professor candidates must demonstrate their potential to establish an independent, extramurally-funded research program. Associate Professor candidates must have an outstanding record of research accomplishments, including active extramural funding. Medical geneticists interested in patient care and research are encouraged to apply. Successful candidates will also participate in the teaching mission of the Department. Attractive salary and start-up packages commensurate with the candidate's qualifications and experience are available. For a detailed overview of our department, please visit our web site at <http://www.gen.vcu.edu>

Please submit a letter of application specifying the position desired, and include a curriculum vitae, a brief summary of current and future research directions, and the names, addresses, telephone numbers, and e-mail addresses of three references. Send application materials to: Faculty Search Committee, c/o Dr. Joyce Lloyd, Department of Human Genetics, P.O. Box 980033, Virginia Commonwealth University School of Medicine, Richmond, Virginia 23298-0033. For additional information contact Dr. Joyce Lloyd, Phone: (804)828-9632 Ext. 136, Fax: (804)828-3760, E-mail: jlloyd@hsc.vcu.edu

Virginia Commonwealth University is an Equal Opportunity/Affirmative Action Employer. Women, minorities, and persons with disabilities are encouraged to apply.

Does your patient have TYPE III Gaucher Disease?

If yes consider referring them to a NIH study sponsored by NINDS. The study is an experimental study involving an investigational oral treatment for NEURONOPATHIC GAUCHER DISEASE. The primary objective is to evaluate the effect of OGT 918 on the neurological abnormalities in persons with NEURONOPATHIC GAUCHER DISEASE. Patients must be on a stable ERT for at least 6 months. All studies are carried out in compliance with safety and testing standards of the US Department of Health and Human Services.

WHO: Patients 12 years of age and older are eligible.
WHERE: NIH Clinical Center in Bethesda, MD.
COST: There is **no cost** to participate and travel assistance is provided.

REFERRALS: 1-800-411-1222 1-866-411-1010 (TTY)
