

**CORRIGENDUM:** Too much, too soon?: Commercial provision of noninvasive prenatal screening for subchromosomal abnormalities and beyond

Megan Allyse PhD and Subhashini Chandrasekharan PhD

*Genet Med* advance online publication, March 19, 2015; doi:[10.1038/gim.2015.23](https://doi.org/10.1038/gim.2015.23)

In the published version of this article, there was an error in row one, column four of Table 1. There was a typographical error in the final microdeletion, 11q (Jacobsen syndrome). The corrected table appears below. The authors regret the error.

**Table 1** Commercial offering of noninvasive prenatal screening for subchromosomal abnormalities

Company	Test name	Trisomies	Microdeletions	Testing option
Sequenom	MaterniT21Plus <sup>a</sup>	21, 18, 13, 16, 22	22q11.2 (DiGeorge or velocardiofacial syndrome), 1p36 deletion, 5p (Cri-du-chat syndrome), 15q11.2 (Angelman and Prader-Willi syndrome) 4p (Wolf-Hirschhorn syndrome), 8q (Langier-Gideon syndrome), 11q (Jacobsen syndrome)	Opt out
Natera	Panorama <sup>b</sup>	21, 18, 13	22q11.2 (Di George or velocardiofacial syndrome), 1p36 deletion, 5p (Cri-du chat syndrome), 15q11.2 (Angelman and Prader-Willi syndrome)	Opt in
BGI	NIFTY Plus <sup>c,d,*</sup>	21, 18, 13	5p-, 1p36, and 2q33.1 deletions	N/A
Igenomix <sup>e</sup>	Nace Plus <sup>f,*</sup>	18, 13, 21, 9, 16	22q11.2 (DiGeorge syndrome), 1p36, 15q11.2 (Angelman, Prader-Willi syndromes) 5p (Cri-du-chat syndrome), and 4p (Wolf-Hirschhorn syndrome)	N/A
Illumina	Verifi <sup>g</sup>	18,13, 21, 9,16	22q11.2 (DiGeorge syndrome), 1p36, 15q11.2 (Angelman, Prader-Willi syndromes) 5p (Cri-du-chat syndrome), and 4p (Wolf-Hirschhorn syndrome)	Opt in

\*In these cases the tests are differentiated by name to specifically order the microdeletion testing content.

N/A, not applicable.
