

Announcement

12th International Chromosome Conference 4–8 September 1995 Madrid, Spain.

Anyone wishing to be put on the mailing list to receive the First Announcement giving preliminary information about this meeting should send their names to:

Professor M. J. Puertas
Dpto. Genética
Fac. de Biología,
Univ. Complutense
28040 Madrid,
Spain.

Erratum

COMPTON, S. G., BEESLEY, S. G. & JONES, DAVID A. (1988). Variation in the colour of the keel petals in *Lotus corniculatus* L. 5. Successional differences in the distribution of dark-keeled plants. *Heredity*, **61**, 235–245.

Between proof and publication, the correct version of Fig. 3 was replaced by a duplicate of Fig. 4. As a result the comparisons made in the text between Figs 3 and 4 are incomprehensible.

The correct versions of the two figures are given below. No changes to the text are required because the comparisons made were based on the correct figures.

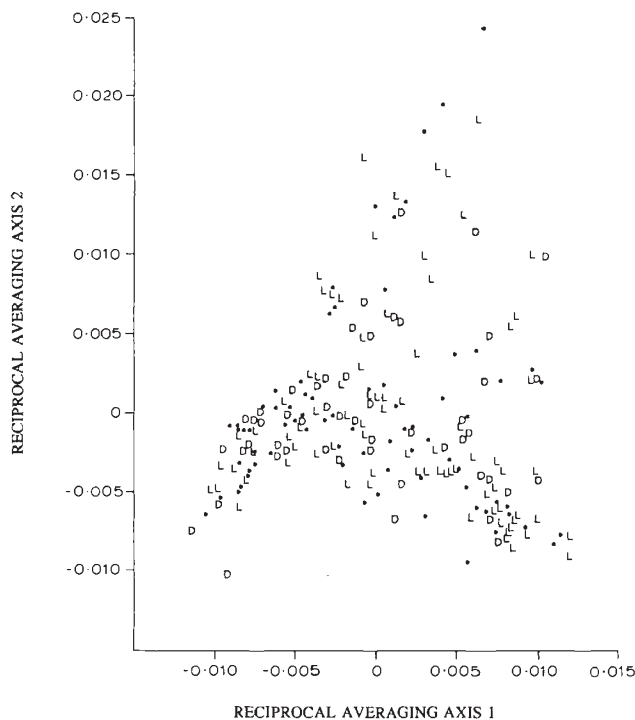

Fig. 3 Ordination of 1 m² sample quadrats surrounding dark-keeled (D), light-keeled (L) and non-flowering plants (·) at Wharram Quarry.

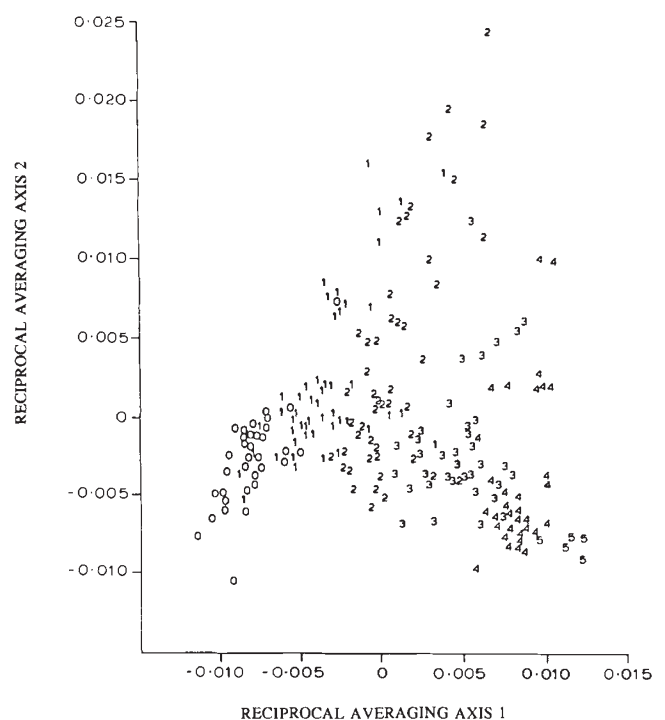

Fig. 4 Ordination of 1 m² sample quadrats displaying the area of bare ground in each quadrat. 0 = < 1 per cent bare ground, 1 = 1–10 per cent, 2 = 11–25 per cent, 3 = 26–50 per cent, 4 = 51–75 per cent and 5 = > 75 per cent.
