

EDITORIAL

Commentaries section enhanced

Hypertension Research (2013) **36**, 477; doi:10.1038/hr.2013.32

From this issue, *Hypertension Research* (*HR*) has started publishing commentaries on one or more recently published, hypertension-related research articles that are of interest to our readers. This is a new addition to the section of existing commentary articles in *HR* that are based on the researches published in this journal. We think it is a good complement and will make *HR*'s commentary section more attractive and useful to readers. Commentary articles are usually commissioned from recognized experts, and we ask authors to provide a balanced

overview of the field and not to focus on their own work or that of their close colleagues.

We hope you will find *HR*'s newly enhanced commentaries section interesting. Your comments and suggestions are always welcome.
