CORRIGENDUM

RESULTS BY EXPOSURES—5.2. Foods.

The associations between food, nutrition, physical activity, and the risk of weight gain, overweight and obesity: a systematic review of the epidemiological evidence

CD Summerbell, W Douthwaite, V Whittaker, LJ Ells, F Hillier, S Smith, S Kelly, LD Edmunds and I Macdonald

International Journal of Obesity (2010) **34**, 788; doi:10.1038/ijo.2009.270

Correction to: *International Journal of Obesity* (2009) **33**, S13–S27; doi:10.1038/ijo.2009.85

Since the publication of *IJO* (2009) Volume 33, Supplement 3, the authors have identified an error in this paper:

On page S26, the second paragraph in the left-hand column should read (revised text in bold):

‘In a cohort of American (mainly white and low income) preschool children (***n* = 1345 were participants from the original North Dakota WIC Program cohort**), followed up over 8.4 months, Newby *et al.*⁵¹ assessed (using an FFQ) the consumption of milk (oz per day). Weight gain/increased BMI was not related to milk intake at baseline.’

The authors would like to apologize for this mistake.
