**Correction to:** *The Journal of Antibiotics* (2016) **69**, 611–615; published online 13 January 2016; doi:10.1038/ja.2015.142

The authors of the above article noticed and corrected the following error in the publication of this paper.

In 'Physicochemical properties of iminimycin A (**1**)' under the Results section, appearance and optical rotation were wrong.

Below is the corrected version of the subsection 'Physicochemical properties of iminimycin A (**1**)'.

Compound **1** is readily soluble in H<sub>2</sub>O and MeOH and was obtained as a pale yellow oil ( $[\alpha]_{\text{D}}^{23.5} - 34$  ( $c = 0.1$ , MeOH), UV (MeOH)  $\lambda_{\text{max}}$  ( $\epsilon$ ) 269 (2710) and 282 (2686), and IR  $\nu_{\text{max}}$  (KBr)  $\text{cm}^{-1}$  1682, 1404, 1203 and 1141).
