Erratum: Variability in intraosseous pressure induced by saline flush of an intraosseous cannula by multiple practitioners

Bernard J. Rubal, PhD, Kathleen McKay, BS, LATG, Kevin R. Armstrong, DVM, Mark P. Rubal, EMT-P & Melissa J. Marbach, DVM
Lab Anim. (NY) 41, 224–229 (2012).

The correct formula describing the relationship between peak intraosseous pressure and the duration of flush is $1,406e^{-0.246t}$.
