Since the publication of this paper, the authors have noticed an error in Table 1. The correct version is shown here.

**Table 1** A20 abnormalities and clinicopathological correlation in MALT lymphoma

Abbreviations: ADV8, adenovirus type 8; CPN, *Chlamydia pneumoniae*; CPS, *Chlamydia psittaci*; CR, complete response; HSV1/2, Herpes simplex virus type 1 and 2; LN, lymph node; NS, not specified; PR, partial response; RT, radiotherapy; —, unavailable.

<sup>a</sup>All cases were negative for translocations involving *MALT1*, *BCL10* and *FOXP1*, except case 22, which harbored t(1;14)(p22;q32)/*BCL10-IGH*.<sup>2</sup>

<sup>b</sup>Clinical staging was carried out by careful clinical examination and computerized tomography (CT) or magnetic resonance imaging scan.

<sup>c</sup>Infectious status was available from previous studies and clinical history as detailed in Supplementary Materials and methods.

<sup>d</sup>The results on A20 and TNF genes copy number changes were obtained from a previous study.<sup>2</sup>

<sup>e</sup>Follicular lymphoma was clonally linked to MALT lymphoma and both lymphomas harbored t(14;18)(q32;q21)/*IGH-BCL2*.
