Following the online publication of this article, the authors noted that the work by Jabbour L, Welter JF, Kollar J and Hering TM

(Sequence, gene structure, and expression pattern of *CTNNB1*, a minor-class intron-containing gene—evidence for a role in apoptosis. *Genomics*. 2003;81(3):292–303), which reports on the initial discovery, description and characterization of *CTNNB1*, was not cited in the article. The authors apologize for this omission.

Disorder-specific functional abnormalities during sustained attention in youth with Attention Deficit Hyperactivity Disorder (ADHD) and with Autism

Following the online publication of this article, the authors identified an error: only 60% of patients with ADHD ($N = 12$) were

medication-naïve, while the other 40% ($N = 8$) were free of psychostimulant medication (Methylphenidate: 5 Concerta; 3 Equasym) for 36 h, more than 9 times the half-life of the drug.
