Genetically modified *Plasmodium* parasites as a protective experimental malaria vaccine

A. K. Mueller, M. Labaied, S. Kappe & K. Matuschewski

Nature 433, 164–176 (2005)

It has been drawn to *Nature's* attention that A.K. M., S. K. and K. M. were named as inventors on a patent application relevant to this work (patent number WO 2005/063991) in 2004, which should therefore have been formally declared as a competing financial interest. The authors' non-profit institutions filed for patent protection to promote the development and distribution of malaria vaccines to people in need worldwide, in accordance with a global access strategy¹.

A Mesozoic gliding mammal from northeastern China

Jin Meng, Yaoming Hu, Yuanqing Wang, Xiaolin Wang & Chuankui Li

Nature 444, 889–893 (2006)

Of the binomen *Volaticotherium antiquus* established for a Mesozoic gliding mammal discovered from northeastern China, the termination of the trivial name should have a neuter suffix to agree with the gender of the generic name¹. The species name is therefore corrected to *Volaticotherium antiquum*.

Artificial 'spin ice' in a geometrically frustrated lattice of nanoscale ferromagnetic islands

R. F. Wang, C. Nisoli, R. S. Freitas, J. Li, W. McConville, B. J. Cooley, M. S. Lund, N. Samarth, C. Leighton, V. H. Crespi & P. Schiffer

Nature 439, 303–306 (2006)

During the field treatment of the samples prior to measurement, the magnetic field was switched in polarity with each step down in magnitude while the sample was being rotated within the magnetic field. A more detailed description of the field treatment can be found in ref. 1.
