In Fig. 4a of this Article, the *x*-axis label “0” of the TBP panel for “No TSS” and “Dubious” should move to the left by one interval. In Fig. 4b and c, the *x*-axis labels of the TBP panel should read “–3, 0, +3”, not “–1, 0, +3”. These errors have been corrected in the original HTML and PDF versions online.
