New Isolines now available. Isolab, Inc. (Akron, OH) has just issued the spring edition of its informational tabloid. The new issue contains technical articles on immunoelectrophoresis, immunostaining, and a centrifugal method for desalting proteins.

Write in 703 on Reader Service Card

Microcarrier and suspended cell culture. A new 6-page, 4-color brochure from New Brunswick Scientific Co. (Edison, NJ) focuses on the engineering concepts behind the CelliGen bioreactor for laboratory and industrial-scale cell culture.

Write in 707 on Reader Service Card

Process equipment. Tekmar Co. (Cincinnati, OH) has prepared its 68-page 1986 catalog. Newly included are a purge and trap stream sampler, fermentors, and a

complete line of laboratory glass washers.

Write in 705 on Reader Service Card

Reverse osmosis equipment. A new six page color brochure from Osmonics, Inc. (Minnetonka, MN) features a complete line of pre-engineered reverse osmosis machines for water purification. All systems produce water with up to 99 percent salt rejection.

Write in 706 on Reader Service Card

Guide to liquid chromatography. A new 16-page publication from LKB (Bromma, Sweden) enables simplified and more cost-effective selection of any liquid chromatography system. The book presents a broad overview of both LC and traditional systems.

Write in 709 on Reader Service Card

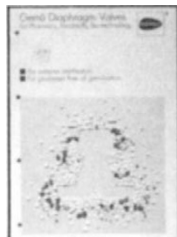

Products for immunologists. A catalog from Sera-Lab, Ltd. (Sussex, UK) includes over 100 new monoclonal antibodies to human, mouse, bacteria and parasite antigens. Their complete line is now available as HPLC-purified immunoglobulins.

Write in 712 on Reader Service Card

Instrumentation, accessories and supplies. A new color brochure from Beckman Instruments, Inc. (Fullerton, CA) gives short product descriptions for ultracentrifuges, spectrophotometers, liquid scintillation systems, laboratory automation systems and more.

Write in 714 on Reader Service Card

Valves for biotechnology. A new data sheet from Gebr. Muller GMBH (Ingelfingen, FRG) describes their line of pneumatically and manually controlled actuators.

Write in 704 on Reader Service Card

Electron microscopy equipment and supplies. An updated reference work from Balzers (Hudson, NH) provides descriptions of equipment and supplies for vacuum evaporation, ion milling, freeze etching and drying, embedding, and sample preparation.

Write in 708 on Reader Service Card

Flow measurement. Omega Engineering (Stamford, CT) offers its 1986 Complete Flow and Level Measurement Handbook and Encyclopedia. With over 250 color pages, the handbook contains 10 sections of technical and product information.

Write in 710 on Reader Service Card

Digital storage oscilloscopes. Applications and purchase considerations for digital storage models are reviewed in a new 12-page brochure available from

Gould, Inc. (Cleveland, OH). A comparison with tube storage oscilloscopes is also included.

Write in 711 on Reader Service Card

New antisera. Dako Corporation's (Santa Barbara, CA) new catalog lists nearly 450 polyclonal and monoclonal antibodies, immunoenzymatic staining kits, control slides and purified proteins.
