VWR Scientific (San Francisco, CA) introduces the **VWR Safety Showcase** catalog, featuring descriptions and photos of personal protection and employee safety products for science and industry.
Write in 701 on Reader Service Card

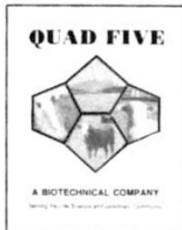

A color brochure from **JM Science** (Buffalo, NY) describes recycling preparative **HPLCs** (models LC-20 and LC-908) for separating gram quantities of mixtures, including position isomers, using polymeric media and mono-solvent operation.
Write in 702 on Reader Service Card

Ion exchange selector chart. The Selectorchart from **Whatman Biosystems** (Maidstone, U.K.) gives clear and easy-to-follow routes for choosing the best ion exchange cellulose media for any application.
Write in 703 on Reader Service Card

Lamp Technology (Bohemia, NY) announces its 1989 **scientific lamp** brochure for spectral, IR, and UV light sources. The catalog cross-references deuterium lamps used in HPLC, atomic absorption instruments, laser excitation, infra-red heating, and ultraviolet curing.
Write in 704 on Reader Service Card

Literature from **Quad Five** (Ryegate, MT) details characteristics of its **serum**, plasma, and blood products. Serum and plasma are supplied membrane-sterilized to 0.2µm or 0.1µm, and serum is tested for mycoplasma and endotoxin.
Write in 705 on Reader Service Card

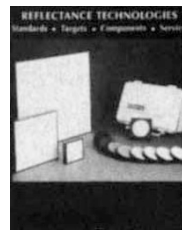

A four-page technical data publication from **Amicon** (Danvers, MA) features **Matrex™ Cellufine™ sulfate**, its new heparin-free **chromatography media** for high-speed processing in closed, low-pressure columns. The packing concentrates, purifies, and depyrogenates viral/microbial antigens.
Write in 706 on Reader Service Card

Updated protocols for nonradioactive labeling of **nucleic acids** with biotin are available from **Enzo Diagnostics** (New York, NY). The brochures describe how to incorporate biotinylated nucleotides into double-stranded DNA and add biotinylated nucleotides to the hydroxy terminus of DNA probes in order to label oligomers.
Write in 707 on Reader Service Card

A four-page color brochure from **Heto Lab Equipment A/S** (Birkerød, Denmark) gives an overview of products for **temperature control** and regulation, including thermostats, water baths, freeze-dryers, and industrial freezers.
Write in 712 on Reader Service Card

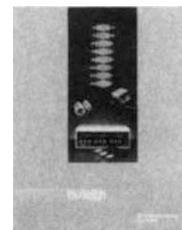

Reflectance Technologies (North Sutton, NH) 16-page catalog, **Reflectance Technologies**, describes **Spectralon®** and **Infragold™** reflectance standards and targets, and presents the company's custom component fabrication, reflectance coating, and measurement services.
Write in 709 on Reader Service Card

A full-color catalog from **Brinkmann Instruments** (Westbury, NY) compares its model **PT 3000** and **PT 6000 homogenizers**. High peripheral speeds provide particle sizes to one micron, using sample volumes from 0.3 ml to 30 l. The operational noise level is 72 decibels.
